ABOUT THIS ARCHIVE

The 1,000 most upvoted posts from **/r/RedPillBooks**, as held by TheRedArchive.

About /r/RedPillBooks. A compilation of great books and reviews for red pillers who want to improve themselves. TheRedArchive has archived 2,573 of its posts, collected since December 2013 and still growing.

About TheRedArchive. TheRedArchive is a free, public archive of the Red Pill community, built so that none of this writing can quietly disappear. It holds **1,686,426 posts** and **38,841,813 comments** from 45 subreddits and 56 blogs. Much of it survives nowhere else — the accounts deleted, the subreddits banned, the websites long offline. All of it is free to read, search and download, and always will be, at www.TheRedArchive.com.

Support the mission. This Red Pill archive is free — no paywall, no account — but keeping it online isn't. I pay for the servers, the storage and the bandwidth myself, so that this valuable knowledge stays online. If you want to support the mission and archive, become one of the people who help keep it online at www.TheRedArchive.com/#help.

Share this file freely, and keep a copy of your own. What sits on one server can be taken down; what sits on a thousand hard drives cannot.

Best regards,

I Created a Better & Improved PDF of The Book of Pook

dream-hunter · 13 January 2020 · Archived copy · Reddit

The Book of Pook is one of my favorite books and I believe that every single man should read it. When I first got the book, I got it from bookofpook.neocities.org including the PDF version of the book. However, I wasn't happy with the PDF version; it was using a hard-to-read font, the pages weren't correctly formatted, and it was very difficult to read on my phone.

Therefore, I decided to use my coding skills to create my own PDF version of the book. And I'm sharing it with the community!

Features:

- Available fonts: Times New Roman, Sans Serif and Baskerville
- Download as: A3, A4 or A5
- Table of Contents with clickable links
- Numbered pages
- View the PDF online without downloading

Links:

- [Book of Pook - A3 - Times New Roman.pdf](#)
- [Book of Pook - A3 - Sans Serif.pdf](#)
- [Book of Pook - A3 - Baskerville.pdf](#)

- [Book of Pook - A4 - Times New Roman.pdf](#)
- [Book of Pook - A4 - Sans Serif.pdf](#)

- [Book of Pook - A5 - Times New Roman.pdf](#)
- [Book of Pook - A5 - Sans Serif.pdf](#)
- [Book of Pook - A5 - Baskerville.pdf](#)

Credits go to a little bit of my coding in PHP, and the code from the website bookofpook.neocities.org created by [/u/onlinebookofpook](#) (thank you for the great work). And of course, the one and only, Pook!

Mega collection of all great titles for download!

RedMorpheus · 17 February 2015 · Archived copy · Reddit

Hey Red Pill Book fanatics,

Update: So thanks to the few who alerted me i noticed that the old link was down. Unfortunately I couldn't find the original file i uploaded so I re-exported most of my book collection and added some new ones. When i made this thread I was looking for "Dominate: Conquer your fears by David De Las Morenas" and I found that one so I added that as well.

Thanks to /u/longerdistance for sharing his copy of The Charisma Myth - Olivia Fox Cabane, I added this one as well so all credits for that one go to him.

So I uploaded everything (this time on Dropbox) [HERE!](#) (Red Pill Books 1.1.rar - 60 MB)

Those sending me PM's about taking it down I say this, I care far more about exposing this information to as many people as possible while I could give less than a fuck about your paycheck.

I have recently bought an e-reader and started reading up on some of the great titles recommended here. So far I have gathered a considerable collection and I thought why not share this wisdom with the rest of you.

If you have any requests than say so and i will look for it and add it to the list.

I myself am still looking for "Dominate: Conquer your fears. Become the man you want to be by David De Las Morenas" but i can't seem to find it, can anyone upload their copy?

Found it and added it to the list!

Kind regards,

RedMorpheus

Female Mating Strategy is not complicated guys, it is simply hidden from us and obfuscated to increase it's effectiveness

Lord-of-Circles · 12 October 2020 · Archived copy · Reddit

Books like Sperm Wars, Practical Female Psychology, The Red Queen, Evolution of Desire take an awfully long time to explain something that isn't really that complicated: Female Mating Strategy

Female mating strategy (hypergamy) is overtly hidden from average men to increase the feminine imperative and maximise male competition/fitness testing.

Hiding your strategy is a classic Art of War/Law of Power tactic that massively enhances the effectiveness of your strategy. Female mating strategy is purposefully hidden from men to increase male participation in the Mating Game because, in reality, Female mating strategy is a cold, calculated machine and its imperative is simply to mate with the best possible male/s, while ensuring provisioning for their offspring. This is all hidden behind purity fantasies, Madonna/Wh0re complexes, Love (chemicals in your brain that make you simp for women and stick around to protect and provide for the kids), Female mind control of Men with the magik pus\$y carrot, Disney blue pill bullcrap for the purposes of making the average man chase his own tail for the term of his natural, productive life.

Men love idealistically, Women love opportunistically

Practical Female Psychology is the mental enslavement of average men for the purposes of procreation and advancement of the species. The only reason female mating strategy has historically been "controlled" is men-of-history understood the all-consuming drug that is femininity. When women are left to "choose" who they want to mate with then you inevitably have 100% of women wanting to procreate with the top 10% of men. This is a society destabiliser, which is why institutions like marriage were created.

If women are left to their own devices then they all breed with Genghis Khan, and recruit betas cucks to raise their kids. Great deal for women, great deal for Genghis, crap deal for the betas.

Side note: Lots of average men are looking for someone to "blame" for the decimated modern SMP. If these men want to blame someone then *cui bono*?

Who benefits?

Genghis Khan-types and Women primarily benefit from the modern SMP, and thus engineered it in collaboration. This is all facilitated by the hordes of thirsty, cucked beta worker-bees who have no idea that their only purpose in life is to work and pay taxes into the Machine that feeds their own sexual oblivion.

CHAPTER V: THE CHIEF END OF MANHOOD

"You must tread on the necks of your enemies if you would win renown. It is success that makes the great man" was Napoleon's dicta. The whole duty of man in this world is to *SUCCEED* — to help himself, defeat his foes; outstrip his rivals. He who conquers not, is conquered. He who is unable to trample rough-shod over others, will assuredly be trampled by them. In the strength of his arm man eats his bread. In the sweat of his brow (and brain), the slave earns bread — for a master.

BIG Subreddit Changes + New Mod

Kaxry · 7 November 2022 · Archived copy · Reddit

Hey everyone, I'm a new staff here. I was a big fan of this subreddit in the past but saw the way it was going and decided to try step in, and I'm able to do so thanks to a staff member from here who allowed me to become mod and fix it.

I'm sure you all know the current situation of this subreddit so I won't elaborate much, but to summarize it's become a cesspit of sellers which goes against what this sub is about, which is sharing redpill books, courses, and other content for everyone for free. I've also seen the sellers taking part in downvoting and reporting to get rid of people actually sharing content, so I'm introducing some new changes to revive this subreddit and make it congruent to its actual purposes.

Here are the changes:

Firstly, no more selling/trading, at all. This subreddit is for SHARING redpill books/content to help each other and not trying to profit off of each other. Any attempts to sell will be a ban, no trying to sell via pm/chat either.

Secondly, no linking to offsite groups (except if they are actually relevant, or provide the content for free) to prevent people trying to sell via linking offsite.

Additionally, the final change to prevent this subreddit and posts from being mass reported and removed, and to ensure its longevity, please put shares in mega links or other trusted file hosts.

Then, put the mega link in <https://www.base64encode.org/> and share the encoded link.

To decode it you just have to go to <https://www.base64decode.org/> so it only takes a few seconds longer but it'll save the sub from mass reporters or anyone with ill intentions.

Finally, please also let me know your suggestions for ways we can revive this subreddit and make it actually fulfil its actual purpose. I will take into account all suggestions from members and help get this subreddit to the way it should be.

I myself have a very large course collection, so I will be sharing things here (100% for free, too.).

Edit: We are now also allowing discussion and posts discussing books, instead of only sharing.

Best Red Pill Book About Health: Nutrition and Physical Degeneration by Weston Price

DANYboy52 · 20 March 2019 · Archived copy · Reddit

This dentist goes around the world studying natives who turned to modern foods and shows how it crippled them. We can all agree that processed foods are bad but the extent is not fully grasped by the majority of people. He shows how faces and bodies become deformed after just one generation of poor eating, cognitive capacities are lessened, and how the spirit and moral of those individuals suffer.

Basically at the end of the book you are going to realise that most human beings on the planet are currently in a state of illness and running at minimal capacities. Natives are happier and have better lives. And that much of what we blame on environment, genetics, or attitude is actually a function of nutrition/health.

Hard Times Create Strong Men by Stefan Aarnio

red_blood_cells · 9 August 2021 · Archived copy · Reddit

Forgot where I found the recommendation from, but I **really** like the book and recommend it to everyone in here. Common themes are:

- Hypergamy: a woman will go for the top 10% (in terms of SMV/status) of whatever world she is in. If she is in the nightclub party world, it will be the bartender, club owner, talent manager, whatever.
- Hard Work, self improvement: a man's purpose is his work. Working towards your goal is masculine. Girls want you to be masculine so they can be feminine
- Video Games and Porn: both are very very destructive. they give you a false sense of accomplishment and undeserved dopamine. it takes 10K hours to master a sport, excel in business, or master an art. It takes only 600 hours of master a video game. Modern men are weak, they will always choose the easier option
- and many many many more topics and concepts about masculinity and being a man

The most Red Pill book of all time

[deleted] · 3 January 2015 · Archived copy · Reddit

I don't even know if I should share it, it's that dangerous.

It might break you, but if you survive, it will make you.

http://www.amazon.com/Might-Right-The-Survival-Fittest/dp/0967812313/ref=cm_cr-mr-title

Red Pill quote:

Young women have an instinctive detestation for the “good young man that died” kind of adorer, and they positively abhor the pale coward — even though he be a blood relation. Strength, energy-of-character, ferocity, and courage, she admires in her possible husband, above all other qualities combined. Even to be carried-off by force is not repugnant to her feelings, if the “bold bad man” is in other respects acceptable. She pines to be ‘wooed and WON’ (or as it were) she likes to feel that she has been mastered, conquered, taken possession of — that the man who has stormed her heart is in all respects, a MAN among men. This suggestive female idiosyncrasy is rhythmically set forth by an anonymous writer thus: — “Down a winding pathway in a garden old, tripped a beauteous maiden, but her heart was cold. Came a prince to woo her, SAID he loved her true; maiden said he didn’t, so he ceased to woo. Came a perfumed noble — dropping on one knee; SAID his love was deeper, than the deepest sea. But the winsome maiden, said his love was dead, and the perfumed noble, accepted what she said. Came a dashing Stranger, took her off by force: said he’d MAKE her love him, and she did — of course.”

I will let this review do the talking...

Redpill archive of top posts

moorekom · 9 April 2017 · Archived copy · Reddit

With the growing censorship of reddit and the possibility that this sub might get suspended someday, I hope this will be of help to the members here. If there are any format changes to be done, let me know.

The archiving was done in two parts.

1. Posts until Jun 2016 was compiled along with the comments and was converted into mobi/epub files for reading in my ereader. I also did a pdf version but it ended up coming up to about 300+ mb. 2. Posts after that point were aggregated using calibre feed. Top 25 posts were collected weekly and monthly. These are just content and no comments are available for these. This might get uploaded from time to time in this thread as time goes on.

This collects almost all of the top posts in the sub. There might be a few that was left out and I would appreciate it if anyone can point out/ upload them if you think some important posts are not here.

How to read these files:

If you have an ereader, you can either load it directly or convert it into your desired file format using calibre and then load it. If you have a tablet/ phone, you can use moon+ reader or similar apps to read them.

We are creating the RPB recommended reading list. Help us decide which books are worthy.

SE17 · 28 January 2014 · Archived copy · Reddit

We are trying to compile a reading list of quality books. It will help people that don't know where to start.

So far in the list we have:

- The Rationale Male - Rollo Tomassi
- Models - Mark Manson
- 48 Laws of Power - Robert Greene
- No More Mr Nice Guy - Robert A. Glover

Other potential candidates:

- Starting Strength - Mark Rippetoe
- The Richest man in Babylon - George S. Clason
- The Book of Pook - Pook
- The Way of Men - Jack Donovan
- Mastery - Robert Greene
- Strength Training Anatomy - Frederic Delavier
- Meditations - Marcus Aurelius
- Way of the Superior Man - David Deida
- Works of Schopenhauer

It's still a work in progress and we need your help!

Let us know your thoughts on the list. Which books should or shouldn't be on it. If you have other recommendations we'd like to hear them.

Ideally we want to keep the list to 10 high quality books.

Edit:

I've been busy lately and will be for a few weeks. I'll get on this as soon as I can. Thanks for all the suggestions.

Not counting The Prince or The Art of War, which books should I use to build my *foundation* of knowledge to build upon? I'm doing many Redpill things (Bodybuilding, BJJ, Guitar, Entrepreneurship, Buying a farm within 3 years) but I've been a slacker in regards to reading/studying. I own the rar and think I have narrowed it down a bit, but I'm not sure if there are better choices or if these are poor choices:

48 Laws of Power, The - Robert Greene

~~Art of Seduction, The~~

Mastery - Robert Greene

~~Book of Poek~~ Seems redundant, no time for that.

Bang

Day Bang

Models_ A Comprehensive Guide to Attracting Women

No More Mr Nice Guy - Robert A. Glover

Rational Male, The

Sex God Method

Text Appeal ~~I'll read this next year.~~ Replacing the art of seduction with this one.

The way of the superior man

The Gorilla Mindset

The Wisdom of Psychopaths (a Dark Triad book)

I own several philosophy books that will also be useful, but I will read them more slowly. My goal is to internalize RP philosophy in 2016. Going full monk mode.

Is it considered Red Pill book?

Any thoughts on it?

It has 10 chapters with each one being a possible reason:

1. You Give Your Power Away
2. You Expect It to Suck
3. You Get Fooled by Appearances
4. You Waste Your Energy on Things That Suck
5. You Keep Trying to Prove Yourself
6. You Say Yes When You Mean No
7. You Think You Have to Do It All Yourself
8. You Try to Fix Other People
9. You Starve Your Soul
10. You Forgot to Enjoy the Ride

Where to find high quality women if you don't like going out at night?

JubJubBang7 · 12 May 2019 · Archived copy · Reddit

I've recently gotten into the redpill movement and it's greatly improved my life. I've have read the Rational male, and many other books that others recommend in the red pill group. For me, I am more out going during the day and hate going out at night, I usually wake up at 4:00-4:30am and try to keep it consistent even on the weekends to improve my sleep and overall well-being. I wake up that early for my job so my nights are when I decompress and recharge. I want some advice to try and find some high quality women without going out at nights. I am a 22m if that helps and not a fan of nightclubs. I am just wondering what you guys like to do to meet high quality women without a lot of red flags.

If you want a quick, easy, great red pill read -- Go get yourself a copy of Ernest Hemingway's The Old Man and the Sea.

I mean if you want to learn about game and manipulation and dominance and that kind of thing, you should probably check elsewhere. But if you want to read a manly-ass story about a manly-ass man saying and doing some manly-ass stuff, this one's for you.

I have made it a point to re-read TOMATS at least once a month since the first time I had to read it in high school. That was 20 years ago. "Red Pill" didn't exist then....but I got all the headstart I needed from this book.

Like in virtually every show aimed towards little kids, the girls are heroic, the boys foolish. The girls save the day. I don't mind that the girls save the day, every once in a while, but for them to *always* do it and the male characters to *always* lag behind is a pity. Like there's Barbie movies too in which Barbie saves the day and is portrayed as competent and heroic, whereas Ken is a borderline idiot who kisses the ground she walks on and always gets in trouble. A lot of kids shows are like this. The father figures are weak, the mother figures all-knowing.

In Peppa Pig, specifically, the father of Peppa is an engineer. He has blue prints lying around the house and everything, has an office, works hard, is a pillar of the community, and yet he's constantly made fun of and used as the butt of jokes because he's a bit fat. It's kinda lame and gives a terrible example. Meanwhile "Mommy Pig" is awesome and pretty much flawless. The whole thing is pretty insidious.

From an early age it sends a message of girls being empowered, but how about the little boys? Like sure there's still superhero movies but those are aimed at a little older audience, plus all those superheroes are usually genetically mutated in some way and unrealistically handsome, so few kids would identify with them.

The Book of Pook & Fountainhead

I've just finished reading the Book of Pook; by far really eye opening and it's lessons will guide me for my whole life. I have now just started reading The Fountainhead by Ayn Rand as stated often in the Book of Pook. And everything that Pook explained to us the readers comes from the Fountainhead if any of you so choose to read it. In Fountainhead, Ayn Rand shows us two men Roarke and Pete; Roarke has a presence that alarms men and women alike giving off a vibe that seems intriguing yet people are afraid of him. While Pete has no thoughts of his own and relies on others and he shits his feelings on woman. I can only say read it, because it has so much valuable wisdom that can be applicable

Looking for books about confrontation and how to behave when confronted/tested by other people

Atilob · 24 May 2020 · Archived copy · Reddit

Hi so I've been reading Models by Mark Manson and The Rational Male by Rollo Tomassi, i understand most of the concepts but i have this major thing i don't understand and that's how to deal with people confronting you.

I've been following instructions from Models and The Rational Male on how to be an "alpha male" and behave like a man, although i know i have a long way to go since I've been dealing with depression and anxiety most of my life but I've majorly improved since reading these books.

My biggest problem is that when i get socially confronted i don't know how to react like i understand it's people testing to see if i truly am what i am projecting; my facade of confidence and such.

Here's a story of what happened to me recently so you can have a better understanding of what im saying: I was in university recently starting out, i was nervous but eager to show my new self to the world, at that moment i was filled with self-confidence.

People sensed it and i caught their attention whenever i made jokes everyone laughed (even when they weren't even that good) and i started to get attention from a lot of girls because of my "alpha" facade.

After some time I've had confrontations with another high social value male (i call him that because he instantly made friends and connections and was really good at befriending people) He called me names and made fun of me saying that i was too skinny and that you shouldn't look like me and his friends mostly laughed with him. I always used to be serious and unresponsive, and he would just look at me and say "oh sorry i din't mean it" and we made nothing of it.

I don't know if i should have reacted there and confronted him head on? Or maybe get into fist fights? To show i don't take shit from anybody? i don't know. Anyway i was still in good social value in my class, after this everything was still the same until he started calling me names, one time specifically he called me a rat and made a joke to go along with it.

Everyone in my classroom was waiting to laugh, and they were waiting for my reaction to see if i could comeback even better (they were expecting that from me) or if i would fall into his frame, like if it was some kind of duel.

I got scared and chickened out and i dint know what to say, i started to panic and felt it was nearly impossible to make a good comeback. I din't know what to do so i just thought it was a good idea to laugh it off as well and unknowingly i contributed to his frame, shortly after everyone started laughing at me as well raising his social value though the roof and mine went crashing down. Girls stopped taking interest in me and i was just a regular and invisible guy again, i need to read something on this, im really lost and feel this is my weakest point and i don't know what to do.

What do you guys think? Or what book would you recommend me to help me with this problem, thanks a lot.

The Appropriate Masculinity Handbook

BLHero · 28 May 2021 · Archived copy · Reddit

A decade ago I discovered the ways in which I was socially inept, and started improving myself.

Realizing that I would want my young boys to know what I learned if something happened to me, I wrote about what I learned as a bunch of essays, many half-finished.

Recently my oldest son became a teenager. So I dusted off those essays, fixed them up, and put them together as [The Appropriate Masculinity Handbook](#).

It is not "red pill" but might be close enough to interest people here.

Constructive criticism would be most appreciated.

What Is A High Value Man? High Value Men Defined

stormbreaker771 · 10 May 2022 · Archived copy · Reddit

What Is A High Value Man? High Value Men Defined

“Full disclosure, I didn’t create the term. High value man has been with us for a long time I have just put my own unique spin on it and popularized and it has gone viral. But here’s the thing, so many people are talking about “high value this” or “high value that”. Many times they are talking about me saying as though *Kevin said this* or *Kevin said that*. Many people are getting it %100 wrong. So in an attempt to make sense of all this I Want to give you guys the 6 basic principles that I define as being high value. Again, you don’t have to agree with what I ‘m saying. But this is what I’m talking about when I’m saying “High Value Man” s your mile may vary, your opinion is you opinion, but this is what I’m talking about so lets get it started.

First of all, let’s go over some basic definitions.

High

/hī/

Great, or greater than normal, in quantity, size, or intensity.

val·ue

/'valyōō/

The regard that something is held to deserve; the importance, worth, or usefulness of

man

/man/

An adult human male

So when you put all that together what do you have?

“An adult human male that’s greater than normal in usefulness to, what? *The group*. Basic economic principle states that the value of something is *what the market is willing to pay for it*. The value is determined by what? *The Market*. And when we’re talking about individuals, the market is *other people, men, or women*. SO a high value man is completely determined by the market. Case and point. You can have a vehicle a home anything in your position, you can hold it dear it can be extremely important to you. But when you put it on the market, *the market decides*. There’s an upper limit and a lower limit It doesn’t really matter if you think the low is too low, or the high is not high enough. That’s what the market Is willing to pay for it. That is its overall value. That has been with us forever. When we start talking that when dealing with people it really throws people because it seems so cold and calculated. Like it or not, that’s the way the world is. Let’s get into this whole High Value Man thing...

1. In order to be a High Value Man, it starts with money. Again, like it or not, I didn’t put the “six figure” thing out there. It’s been with us since the mid-80’s and like it or not that’s where this whole thing starts. You cant be High Value and Homeless so you have to make a certain amount of money and the line is roughly at 10,000 a month adjusted for Atlanta dollars. If you live in San Francisco, LA, New York City or where the cost of living is higher than 100% you need to adjust it. So 10k a month gets the starting point off for High Value. DON’T SHOOT THE MESSENGER. I’m just giving you what the world gave me.
2. That money needs to be made over a length of time. I.e., Performance. That’s roughly about 5 years. At about the 3-year mark you’re starting to scratch the surface. Why does it need to be 5 years? Because it’s a matter of consistency and stability. Look at the NFL, The NBA. *Anybody* can have a great season. But having a great season doesn’t automatically mean you’re going to the hall of fame. They want to see *consistent numbers over a period of time*. You know how this works just like I do. In business you can’t be a one-hit-wonder. Consistency

and performance over a length of time that's why the 5-year mark is so important. At 5 years people can pretty much count on you to say "This person understands and knows how to get it done".

3. Group acceptance. Like it or not guys High Value Man is like a fraternity, it's like a club or a secret society. And High Value Men know other High Value Men. They welcome him into the group. They know what it takes to be there, they know what it takes to get in there. With High Value Men group acceptance is supremely important. Secret societies, fraternities, and organizations have always been with us. You know how this works and how they generally interact. Guys will make their own secret societies and club, but it doesn't matter as much as somebody saying "that group is important" Guys this is about separation. High Value Men tend to huddle around other High Value Men for reasons I'm going to go into a little bit later. Group Acceptance is another critical component of being a High Value Man. Why is group acceptance so important? Because the next part...
- 4.

A Network. You have to have a network of other High Value Men and others. This is another stumbling block for a lot of people. They may have the money, length of time, and look like they fit the group, but if they don't have any of the High Value contacts, network, or group of others that person is going to be looked at with a side-eye. Think of it like this. If you're sitting at the table with 10 High Value Men and each of these 10 men has 50 contacts that's 500 contacts and you sit at the table and you have twice as much money as any man on their, but you have ZERO contacts. What can you effectively get done other than throw money at it? These other man cane make phone calls, exert influence, move things to get things done. You can only do what? Offer money and potentially feed of their network of contacts. One thing High Value Men know and understand that *time is what is important*. Building a network that actually works for you is extremely important. In some areas its called a "book of business". A book of business can make you successful all over. *Your network is your net worth* You've heard it before so you cannot underestimate how important having a network of High Value Men and other people is to your status as a High Value Man.

1. Visibility.

Guys, your income and your position has to be LinkedIn Level. Think of it like this. This person says "I'm the CEO of a furtune-500 company" or "I'm head of thoracic surgery and John's Hopkins." And "I am VP of merges and acquisitions at Bank of America". And then someone says "High I'm an entrepreneur..."

Three of those four people at a glance, we can estimate who they are, what they do, and their relative importance in the overall socio-economic structure. The 4th person, more information is needed. They don't have enough Visibility. Not enough transparency. To be a High Value Man it needs to be *at a glance*. Again, your position and your income. Guys, you may have a lot of money but if it's coming from sketchy areas where no one can understand where its coming from that does not give *other* High Value Man or even the public any real confidence that you are who you say you are. Again guys, it's about the market, it's what the world is thinking. They need to know that you are a High Value Man.

1. Useful to others and the group

This is probably my favorite. A lot of times you hear people say "I don't want to be used..." No, I want to be used because that means I am *useful*. High Value Men are in-demand and *useful*. Their Prescence is felt when they're there and their absence is felt when they're gone. That is how you know when you're really a High Value Man. How you can move things, your ability to influence things. That is your relative usefulness. In economics its called...(economic term. Udels? Youdels?) How useful are you to the group? There's no High-Value-Homeless, neither are there any High-Value-Loners. If you have all these resources, all this stuff but its all hoarded for your own selfish ends, and no one can benefit from your money, your network or anything you have. How valuable are you to the group? The world? To other people? That's what this comes down to. High Value Men are in demand and useful to other people.

As I said from the beginning, High Value is all the rage, all the buzz right now. I didn't make it but I wanted to clarify what I mean when talking about it. The six basic principles of being a high value man and that by no means is the end of it. Each individual person after that six basic things they may put other things on top of it, they may have religious concerns, personal motivations. But those six core things *need* to be there. Look at it this way. High Value has been with us forever. There's always been a ranking system, irrespective of race, culture, or period of time. You will see higher value men, or higher value individuals separate or be separated from the pack. That is how this works. You don't have to like it but you do need to accept it, High Value men understand that the world is a competitive place. All is fair in love and war, right? High Value does two things for a man. It gives you more options, and it gives you an opportunity to get more favorable outcomes. If you want more options or more favorable outcomes, you need to increase your overall value. That principle is pretty well understood everywhere except when it comes to us. It gets personal, hard, and difficult. And some of us don't like to reduce human beings to things that are so seemingly cold and calculated. Like it or not, that is what it is. We have civilized the world in general, we have evolved. But at the end of the day we still have that primitive brain, that hunter-gatherer, fight-or-flight and even though when wearing a suit and all that other kind of stuff, that is who we are when it gets right down to it. Better to know that exists than to ask yourself "what do you want to do about it?" and try and fight against this whole thing of High Value, or not High Value.

Last thing, just because you're not a "High Value Man" does not mean you lack value or you have no value. Just because you may not be surprisingly useful to the group, does not mean you're useless. High Value is not a way of saying "these guys are great" and "these guys are nothing" But it is a mark, it is a fact of life. IT comes into play when men are dealing with men, and women are dealing with men. You can't get over it guys so you might as well understand it accordingly.

All words in the Youtube Video titled above are by Kevin. R. Samuels.

I haven't heard from her for two weeks , and suddenly she contacted me and sent me a Picture of her clean STD test , I'm not a massive plate spinner , I don't have options or other girls waiting on the line , but apparently persistence and sticking to your beliefs , values and avoiding red flags do reward you in time.

I am a man of many red flags - and a firm believer of sexual transmutation - I refuse to waste my sexual energy on Beta Females and especially smokers/drinkers , found a girl that fits my bill - my age,no drug usage, slim,no pets,no kids and doesn't want them etc..

I was even doubting my self that no unicorns exist , that I should give up and put the SMV dating game aside , deleted tinder and social media as well.

Just wanted to say that there is hope , exercise , eat well , and work on yourself , and the girls will find a way to fuck you if they are interested.

"The greater danger for most of us lies not in setting our aim too high and falling short; but in setting our aim too low, and *achieving* our mark." - *Michelangelo*

This book is a few hundred dollars. It is a book much better to read fully than to summarize but I did not have the equipment to OCR, and I doubt the demand is there.

The primary objective to overcoming barriers and bending individuals to your will is to Get. Them. Talking.

Culturally, individuals are inclined to not want to bother acquaintances or strangers, or quote soft-hearts. These cautious subjects may be otherwise socially functional adults. Hard-hearts view people as opportunities for advancement. Hard hearts do not use people and discard them necessarily, they also keep them around. Soft hearts walk on eggshells. In high social circles, people who do not like each other often still talk to each other. If you're feeling daring, avoid the obstinate. At a cocktail party, don't drink cocktails, nor coffee on a coffee break. Use it as an opportunity to advance.

People care about your appearance. Your appearance is the national anthem, your actions and output are the ballgame.

If you're a suit person, make it a nice suit. If you're a t-shirt person, be a nice t-shirt person.

Be prepped – if it is an extremely important guest make a list of possible questions – you don't need to use all or even any of them. If you do not care about this person and they do not care either, just go with the flow and have a drink with them. Might as well. Store one individual nugget about this person and keep it. Another opportunity is when you hear someone talking about someone, do not be afraid to say “so and so told me you like fishing.” Secondly, be specific – he likes deep sea fishing in the Gulf. Go one more over the basic. Read the news headlines for a second if you're going to a large social occasion.

Take another step, and go to Hey to C. Looking at a nice view with your host? That's a nice view is A to B. That is a view (A) it is nice (B).

In contrast: “I think you own everything down there” or when referring to car lights below... “Red rubies going that way and white diamonds coming towards us.”

Here are a few tidbits regarding general don'ts:

- Don't expect more than a slight edge when you woo those in power. If your credit is bad, they still will not give you a loan.
- Don't tell dirty jokes, even to people who tell dirty jokes. An intimidator won't appreciate that. If it's a good one, they will re-tell it (and not credit you).
- Do not ask what a person's occupation is. How do you spend your time these days?
- Don't hesitate to help a conversationalist in need. The Coast guard does not evaluate the moral character of a person drowning.
- Don't start a sentence of which you do not know the end.
- Do not assume Clark Kent is the only person that wears street clothes, or in this case a suit or dress. If Clark Kent does not acknowledge or need you for any reason, be confident in your own accomplishments, or be “plugged into your own socket

A person going through personal turmoil may not be missing an arm, they may have just undergone bankruptcy, or divorce. It's why what do you do and where's your better half are weaker inquiries.

Do use quote Look at you questions – not look at me questions. The questions should have your involvement, not a

rattling off of facts on the topic of historical significance.

Use the prefatory statement “I need your advice” in a power differential . Asking for advice is one pull of the engine cord, it may not work the first time or for this person.

Story interrupted? “Now then... back to your story” (with bullet points if you remember them) “As I was telling you...:

Sophisticated people take risks in small talk, and don’t avoid the possible awkwardness it procures In conversation, you may be passing the ball to someone who does not know how to run. If someone says “Greg’s a master of real estate”, you can repeat the word real estate for time. One example is “I have been thinking a lot about real estate lately. I bet you know all about it”. Elicit expertise, and ask for advice. Be general when talking to doctors lawyers scientists – no specific individual advice. Put your subject of conversation on the evening news: even respected judges are rarely queried for their opinions on matters by the media or populace at large.

Even when there is no power differential, you can still seek advice. They are the university, you are the applicant.

Filling silence with talk is a rather unique attribute of our species. While only one best actor award exists per year, every has got to be someone. The regular Joe fills silence with the way lightning strikes the nearest object, it just does so without much profound impetus. Use hyperbole to describe someone and seemingly florid language if they earned it like... this sanitation engineer sparkles streets across Texas. Background, attributes, capabilities – what is this person secretly proud of?

Stroke the ego of multi-dimensionality, multi-dimensional people want to be acknowledge for their diversity. “I’m interested. Tell me more.” Always feign being impressed at proclamations of grandeur, because it is better to acknowledge something someone is beaming because letting them twist in the wind is much worse.

Craft more appealing ways to say things. Simplistically, instead of this thunderstorm is bad “wind is really whipping around out there, the trees are protesting mightily and the lightning is really dancing around the dark sky.”

Very few people have had an original thought. Do not be afraid to take from better minds than you, you would be surprised how few traditional people call you out for stealing. One or two snobs do care if you did not write it, and few care if you stole it. So to appease that small latter minority you can just give credit to the original writer.

A few quick quotes and aphorisms:

Most people are on your side, just with varying levels of investment, frequently little.

Politics is a relatively accurate reflection of life, not a perversion of it.

You can make your own clichés pretty easily. Riff off of “happy as a lark” but never happy as a lark.

Do no harm in conversation. Do no harm. Wouldn’t it be dumb to ask the President “What’s new?” or “What do you do?”

Feel the strength of going through life without putting anyone down. You never meet a person you can’t compliment to their face, even though it may take great strain. Put downs are fleeting amusement for the crowd, being generous and kind and interested may prove to be more enduring.

If you feel the need to hurt someone, at least do not do it by accident.

If you get along with someone naturally using these techniques, you may never need to ask a favor of them. They might just do it for you.

Ingratiate those who are equals even. He who needs the warmth must fan the flame.

Try focusing on ideas people hate most, and procrastinate on the most, because they are scared of failure.

When talking to an Intimidator, or a person who prides themselves on being intimidating: I don’t know much about

that other than x. Could you school me? Forgive me, but I am fascinated by that. Tibetan shepherds do not threaten or challenge the Dalai Lama, they can be happy or proud just being on the same mountain.

The feelings elicited by you speaking are more important the meaning of your words. Life is not a poll about issues, it is a popularity contest.

Compliments should be brief, credible and specific.

Identify the purpose of your talk. If you have hit a home run in conversation – remember the point is to touch home plate so you get the run.

America is one of the few places you can approach the throne; where in the right setting you can briefly speak to a King – a titan of a particular industry.

An addendum about women:

Women do not like it when you try hard (to impress them). A modern woman feels she can achieve on her own.

With women, you are guilty until proven innocent.

Those who tweak a little can get rich, by putting a wrinkle in their personality. Doubly so if you are attractive.

You may be disliked so intensely upon sight no amount of conversation will help.

During introduction - talk about acting and painting if they are actors and painters, not THEIR SPECIFIC acting and painting.

You're from x, do you know so and so – is a low yield question. That is a good way of framing a question however, when you know the person knows that other person.

Show romantic intent by showing an aperture of intimacy.

Like someone's line of work or hobbies, one can do cool talk about hot things. "Now I would never inject such discussion with a lovely lady such as yourself but say a man was passing by..." or "What's the best pickup line you have ever heard?"

Opener to people watching – "You're just in time to watch a silent movie with me..."

Most talk beats no talk, but most generic talk is simply fast food, while wrinkled speech is a four course meal.

Get on the side where a girl is holding something, she may be into you if she switches up the item, a subconscious indicator of interest.

I am almost through this book right now, and I have found that practicing it's techniques on Facebook of all places has been amazing.

Be kind and positive to the people you are friends with, and be sincere about it.

Find a group that talks about something controversial; Politics, current Police issues, etc etc.. Then join in the conversation, while utilizing the lessons from the book. Eliminate emotion from your responses, show respect, try to understand the other persons point of view, etc etc.

It has been really helpful to me so far, and I hope others agree.

- Using, as an excuse, others' failure of common sense is in itself a failure of common sense.
- The characteristic feature of the loser is to bemoan, in general terms, mankind's flaws, biases, contradictions, and irrationality—without exploiting them for fun and profit.
- "Wealth" is meaningless and has no robust absolute measure; use instead the subtractive measure "unwealth," that is, the difference, at any point in time, between what you have and what you would like to have.
- Friendship that ends was never one; there was at least one sucker in it.
- A good foe is far more loyal, far more predictable, and, to the clever, far more useful than the most valuable admirer.

Stoicism

[deleted] · 15 February 2014 · Archived copy · Reddit

Stoicism is an ancient philosophy which is concerned with one's concrete way of life. The good life, according to the Stoics, is marked by virtue (arête), and not by fleeting mental states (of pleasure and pain). Virtue (arête), here, should be understood as patterns of human excellence. Stoic philosophy, therefore, focuses on concrete practices in excelling in the art of living. Here, I'll mention three major themes: stoic mindfulness, mortality, and hardships. Let's begin.

Stoic Mindfulness:

Epictetus starts his book, *The Art of Living*, by stating: "Some things are within our control, and some things are not. It is only after you faced up to this fundamental rule and learned to distinguish between what you can and can't control that inner tranquility and outer effectiveness become possible." This is called the dichotomy of control. The idea behind this dichotomy is to accept whatever is not within control as facts (leading to inner tranquility) and focus all your energy on the things you can control (leading to outer effectiveness).

As an example, imagine a soccer match. You, as a player, are in control of your own performance. You have a very limited influence on the performance of your team members. You have no control over the actions of the members of the opponent team, or over the mistakes of the referees, or the weather, and so on. These externals should not rule over your mind. Instead, you should understand them, only to improve your own performance. And, the outcome of the match is something you can only partially influence. You do your best and let the outcome emerge. Hopefully the preferred outcome, but you're not attached to it. This parallels the so-called outcome independence, applied to the whole of life.

"Wherever you find yourself and in whatever circumstances, give an impeccable performance." (Epictetus)

Mortality:

As an important application of the dichotomy of control, we must realize that our mortality is something beyond our control. It is a fact that we're going to die. A Stoic accepts this fact and governs his life in light of this fact. From the perspective of death, he clarifies what matters for him in life, takes responsibility for his life, and directs all his energy on the endeavors he deems worthy--since our finitude decisively differentiates significant pursuits from mindless trivia and necessitates disciplined focus to prevent waste. "Carpe Diem" is the resulting maxim.

"When we view things from the perspective of death, it is impossible to let a single one of life's instants pass by lightly. ... The thought of death confers seriousness, infinite value, and splendor to every present instant of life. "To perform each of life's actions as if it were the last" means to live the present instant with such intensity and such love that, in a sense, an entire lifetime is contained and completed within it." (Pierre Hadot, *The Inner Citadel: Meditations of Marcus Aurelius*)

"As Seneca understood, to free yourself from fear you must work backward. You start with the thought of your mortality. You accept and embrace this reality. You think ahead to the inevitable moment of your death and determine to face it as bravely as possible. The more you contemplate your mortality, the less you fear it—it becomes a fact you no longer have to repress. By following this path, you know how to die well, and so you can now begin to teach yourself to live well. You will not cling to things unnecessarily. You will be strong and self-reliant, unafraid to be alone. You will have a certain lightness that comes with knowing what matters—you can laugh at what others take so seriously. The pleasures of the moment are heightened because you know their impermanence and you make the most of them. And when your time to die comes, as it will some day, you will not cringe and cry for more time, because you have lived well and have no regrets." (Robert Greene, *The 50th Law*)

Hardships:

For Stoics, hardships are opportunities to exercise virtue/excellence, to grow our capacities. We shall seek to

flourish in the midst of life's challenges. From the perspective of the dichotomy of control, hardships are most often caused by things beyond our control, but how we handle them is within our control--and that's where value resides.

Life is full of challenges, and happiness/fulfillment should be found in overcoming and growing through them. Manliness, itself, is judged based on how one deals with life's challenges. Indeed, when we contemplate the lives of great men who inspire us, they are the ones who undertake and rise above great challenges: that's what makes them great and inspiring. As Seneca declares: "Manliness gains much strength by being challenged."

"Whatever stands in the way becomes the way." (Marcus Aurelius)

Although not a Stoic himself, Nietzsche magnificently summarizes the attitude: "Ask yourselves whether a tree which is to grow proudly skywards can dispense with bad weather and storms." We shall seek the heights, and welcome all that comes with it.

Conclusion:

I believe Stoic philosophy can benefit us all. It is a philosophy of self-mastery and resilience. I talked about three major themes, yet there's a lot more to explore. I'd advise all you guys to incorporate Marcus Aurelius, Seneca, and Epictetus into your reading program. Robert Greene's *The 50th Law* is also full of Stoic themes and references, if you prefer a more contemporary exposition. And do not forget about practice.

"Philosophers advise us not to be contented with mere learning, but to add meditation likewise, and then practice. ... If, therefore, we do not likewise put into practice right opinions, we shall be nothing more than expositors of the abstract doctrines of others." (Epictetus)

Arthur Schopenhauer

[deleted] · 11 January 2014 · Archived copy · Reddit

Links for his works: http://en.wikisource.org/wiki/Author:Arthur_Schopenhauer

Here are some quotes from the ones I've read:

- He will be least afraid of becoming nothing in death who has recognized that he is already nothing now.
- Human life must be some kind of mistake. The truth of this will be sufficiently obvious if we only remember that man is a compound of needs and necessities hard to satisfy; and that even when they are satisfied, all he obtains is a state of painlessness, where nothing remains to him but abandonment to boredom. This is direct proof that existence has no real value in itself; for what is boredom but the feeling of the emptiness of life? If life—the craving for which is the very essence of our being—were possessed of any positive intrinsic value, there would be no such thing as boredom at all: mere existence would satisfy us in itself, and we should want for nothing. But as it is, we take no delight in existence except when we are struggling for something; and then distance and difficulties to be overcome make our goal look as though it would satisfy us—an illusion which vanishes when we reach it; or else when we are occupied with some purely intellectual interest—when in reality we have stepped forth from life to look upon it from the outside, much after the manner of spectators at a play. And even sensual pleasure itself means nothing but a struggle and aspiration, ceasing the moment its aim is attained. Whenever we are not occupied in one of these ways, but cast upon existence itself, its vain and worthless nature is brought home to us; and this is what we mean by boredom. The hankering after what is strange and uncommon—an innate and ineradicable tendency of human nature—shows how glad we are at any interruption of that natural course of affairs which is so very tedious.
- The existence of the plant is just such a restless, never satisfied striving, a ceaseless activity through higher and higher forms, till the final point, the seed, becomes anew a starting-point; and this is repeated ad infinitum; nowhere is there a goal, nowhere a final satisfaction, nowhere a point of rest.
- Suffering is a condition of the efficacy of genius. Do you believe that Shakespeare and Goethe would have written, Plato philosophised, Kant criticised Pure Reason, if they had found satisfaction and contentment in the actual world surrounding them; if they had felt at home in it, and it had fulfilled their desires?
- The more a man has in himself, the less he will want from other people—the less, indeed, other people can be to him.
- Each man's leisure is worth as much as he himself is worth.
- There is an unconscious propriety in the way in which, in all European languages, the word person is commonly used to denote a human being. The real meaning of persona is a mask, such as actors were accustomed to wear on the ancient stage; and it is quite true that no one shows himself as he is, but wears his mask and plays his part. Indeed, the whole of our social arrangements may be likened to a perpetual comedy; and this is why a man who is worth anything finds society so insipid, while a blockhead is quite at home in it.
- We forfeit three-fourths of ourselves in order to be like other people.
- The mason employed on the building of a house may be quite ignorant of its general design; or at any rate, he may not keep it constantly in mind. So it is with man: in working through the days and hours of his life, he takes little thought of its character as a whole. If there is any merit or importance attaching to a man's career, if he lays himself out carefully for some special work, it is all the more necessary and advisable for him to turn his attention now and then to its plan, that is to say, the miniature sketch of its general outlines. Of course, to do that, he must have applied the maxim "Know Thyself"; he must have made some little progress in the art of understanding himself. He must know what is his real, chief, and foremost object in life, what it is that he most

wants in order to be happy; and then, after that, what occupies the second and third place in his thoughts; he must find out what, on the whole, his vocation really is—the part he has to play, his general relation to the world. If he maps out important work for himself on great lines, a glance at this miniature plan of his life will, more than anything else, stimulate, rouse, and ennoble him, urge him on to action and keep him from false paths.

- No rose without a thorn. Yes, but many a thorn without a rose.
- We look upon the present as something to be put up with while it lasts, and serving only as the way towards our goal. Hence most people, if they glance back when they come to the end of life, will find that all along they have been living ad interim: they will be surprised to find that the very thing they disregarded and let slip by unenjoyed, was just the life in the expectation of which they passed all their time. Of how many a man may it not be said that hope made a fool of him until he danced into the arms of death!
- My life is a bitter-sweet draught; like my whole being it is a constant gleaning of cognition, an acquisition of knowledge regarding this actual world and my relation to it. The result of this cognition is sad and depressing; but this state of cognisance, this gain of insight, this penetration of truth, is thoroughly pleasureable, and strange to say, mixes sweet with bitter.
- I shall be told, I suppose, that my philosophy is comfortless—because I speak the truth; and people prefer to be assured that everything the Lord has made is good. Go to the priests, then, and leave philosophers in peace! At any rate, do not ask us to accommodate our doctrines to the lessons you have been taught. That is what those rascals of sham philosophers will do for you. Ask them for any doctrine you please, and you will get it. Your University professors are bound to preach optimism; and it is an easy and agreeable task to upset their theories.
- Religion is the masterpiece of the art of animal training, for it trains people as to how they shall think.
- Is the world mad or I?

Western women

Remember in the 1980's what the gay community used to say "Go West", well I would recommend heterosexual males "Go East".

Why?

Because I travelled there, and I can tell you eastern European women are far superior on many levels.

They are well educated.

They are emotionally stable.

They are physically beautiful.

They are not overweight. Here in Australia 67% of women are obese.

They are not afraid to have a family. Australian women want to wait until they are late thirties, or their careers are more important to them.

They do not get into power struggles with you.

They are more individual in their personal style.

I could go on and on...

Anti-Love Non-fiction suggestions?

I am looking for non-fiction books which inspect the current blue-pill modern love and soul mate bullshit that has plagued the society for a few hundred years now. Books which inspect how this infection spread and spread so well. Books which deconstruct what love is and how advertisers, media, billion dollar industries capitalise on and propagate to make money. Books which deconstruct blue-pill fantasies of love using data or neuroscience or evolution psychology or scientific research and show us how our psychology is being leveraged and we are being blue-pilled as a society.

I tried searching but all I keep getting is fiction book recommendations. The only thing I've found so far is Medieval Misogyny by R. Howard Bloch. Anyone know any other good books?

I was recently having a look through the "best dark triad book to read" on this subreddit. I would recommend having a look through the books that were given to the poster (

https://www.reddit.com/r/redpillbooks/comments/a8yfbf/recommended_dark_triad_books/).

This got me thinking... what kind of a man would you become if you completely live what is written in these books? You not only read these books but meditate on them. I am interested to know what you guys think. What kind of a man can you picture? Would you want to be friends with this man? Would you look up to this man? Would this man become a great leader? Personally, I think after reading all that, you would be someone who would be highly successful since these books go over the mindset of some high achievers, good or bad deeds. Though I haven't completely absorbed everything in these books so I am not too sure. Maybe it turns you into some psychopathic douche? I am sure there are people here who take this stuff as seriously as I do. I would love to know your experiences and ways of thought.

Anything academic?

theyknowmyrealreddit · 20 October 2014 · Archived copy · Reddit

Are there any academically credentialed books that have a viewpoint where the term "masculinity" is not a pejorative? I'm taking an African American lit class, and after a semester of listening to literally every male character get bitched down in discussion as violently hyper masculine, I would really like to write final that's contrary to that. So, does the peer-reviewed nature of academic sources mean anything TRP oriented doesn't get published, or can you help me?

Welcome to /redpillbooks ! Please read this before posting.

RobBobGlove · 22 December 2013 · Archived copy · Reddit

Welcome to the newly created /r/redpillbooks we hope you will enjoy your stay and learn something from your time here. This subreddit is about discussing books that that you think may have a meaningful impact on those who read them. Trolling or drama will not be tolerated, be civil with each other. Please follow the rules.

1. Posting guidelines

As of this post, your title must be *Book name - Author*. You may also add some context to make it more personal(eg: How Fight Club started my journey of self improvement (Chuck Palahniuk) **Posts not following the title format will not be approved**

Each posting must also include a way to legally obtain the book.

2. Review

Each posting must have a review, the more extensive the better. You are free (and encouraged)to review other submissions as well not bound by this format, any discussion is welcomed. People need to understand why they should bother with reading something.

Please use the following simple format:

- **What's it about?**

A short intro about the book.

- **Who's it for?**

Explain who can benefit most from this book from reading it.

- **PROS**

At least 4-5 reasons why you would recommend someone this book. What's so good about it?

- **CONS**

Every masterpiece has its flaws. Here you warn our readers about what you consider lacking or misleading.

- **Final thoughts**

Your conclusion about the book. Also a rating from 1 to 5 (5 being highest) about the quality of the book.

- **Excerpt and further reading** (optional)

your favorite excerpt from the book and further reading (different media, reviews, discussions etc) You can add anything related to the book in another comment.

3. Be Red Pill

After you understand how the process works your hardest task is not finding the book but presenting your argument. The goal is not to find books considered Red Pill , your goal is to help others getting there. Most books have a lot to teach if viewed from the right angle, a cautionary beta tale, female romance novels and the most comprehensive how to's each can help someone get some new perspective, the basic tenants of /r/TheRedPill Thank you for reading! ★★★ Contents of This Video ★★★

00:00 - Introduction

01:29 - Paradigms and Principles

05:06 - Line of Maturity

06:30 - Emotional Bank Accounts

11:16 - HABIT 1 - Be Proactive

15:26 - Circle of Influence

17:10 - HABIT 2 - Begin with the end in mind

21:07 - HABIT 3 - Put first things first

25:58 - HABIT 4 - Think Win/Win

28:30 - HABIT 5 - Seek first to understand and then to be understood

31:04 - HABIT 6 - Synergize

38:40 - HABIT 7 - Sharpen the Saw

40:33 - 7 habits of highly effective people summary

Stephen Covey researched the past 200 years of success literature and found that in the past 50 years, most self-help and success books have been only focused on things like how you dress, your public image and having a positive mental attitude. In this book he focuses on habits that will improve your character ethic.

The 7 habits of highly effective People is considered to be one of the best self-help books ever written and the 7 habits are as follows.

1 - Be proactive

2 - Begin with the end in mind

3 - Put first things first

4 - Think win/win

5 - Seek First to Understand then to be Understood

6 - Synergy

7 - Sharpen the saw

How to become 100 times better at anything | Atomic Habits summary (by James Clear)

Salty-Conflict-2645 · 19 January 2022 · Archived copy · Reddit

Atomic Habits can help you improve every day, no matter what your goals are. As one of the world's leading experts on habit formation, James Clear reveals practical strategies that will help you form good habits, break bad ones, and master tiny behaviors that lead to big changes.

<https://www.youtube.com/watch?v=PLpln6vbXBk>

If you're having trouble changing your habits, the problem isn't you. Instead, the issue is with your system. There is a reason bad habits repeat themselves over and over again, it's not that you are not willing to change, but that you have the wrong system for changing.

“You do not rise to the level of your goals. You fall to the level of your systems” - James Clear

I'm a huge fan of this book, and as soon as I read it I knew it was going to make a big difference in my life, so I couldn't wait to make a video on this book and share my ideas.

Here is a link to James Clear's website, where I found he uploads a tonne of useful posts on motivation, habit formation and human psychology.

<https://jamesclear.com/>

Lessons you will learn from reading Atomic Habits

- How to make time for new habits ;
- How to overcome a lack of motivation and willpower;
- How to design your environment to make success easier;
- How to get back on track if your habits break down
- How to overcome the plateau of latent potential

This book helped me personally a lot, I hope that now that I am sharing it with you, you will also enjoy it. Any opinion or constructive criticism is welcome.

How to psychoanalyze someone by Scarlett Kennedy - request

StrictQuit · 10 November 2018 · Archived copy · Reddit

From <https://www.amazon.com/Psychoanalyze-Someone-Make-Obsessed-Book-ebook/dp/B07HFJY88Y> (does anyone have a copy??)

--

All humans want control. It's easy to gain control over your finances, career, nutrition, and the decor of your home. The collective complaints often heard are about one's relationships - particularly a person's romantic relationship. Complaints consist of not understanding why someone said something in a demeaning manor, what did they truly mean? What are their motivations?

While you're trying to either act like you don't care, or deeply analyze what they mean, you secretly wish you could take a step into their minds. This is what psychotherapists do. They step into their client's mind, for the purpose of helping them understand themselves and to heal.

Here, we aren't doing this. We're analyzing the depths of their minds to ascertain their lost dreams, dark shadows, untapped potential, motivations, genuine meanings behind their strange behaviours, and unmet needs. We're not therapists with altruistic intentions. If you've picked up this book, it's likely you've read first book of this series: "How to make someone obsessed with you" along with that - you have the desire to control, manipulate, make people bend to your will. First, you'll need to go deep into the abyss of your victim's mind. With this book - you'll learn how.

"Self Made Man", a woman's 18 month experiment living as a man

KardinalMcGillan · 12 July 2017 · Archived copy · Reddit

American lesbian writer Norah Vincent conducted an experiment which is honestly such an eye opener, especially if you can get a woman to read it. Here is a lesbian feminist who spent 18 months as a man, expecting to enjoy all that 'male privilege', but finding something very different. She was very glad to be able to go back to being a woman. As a lesbian, she said that she was looking forward to trying to pick up women as a man the most, but was pretty shattered by the experience. She had not realized how brutal women were towards men, and wondered how men push themselves to keep trying in the face of so much rejection. She didn't go to job interviews or anything like that, which would also have been interesting, of course.

Starship Troopers by Robert Heinlein

Perrodepaz · 22 December 2013 · Archived copy · Reddit

Most people get their impression of the science fiction novel "Starship Troopers" from the movie. The book is very different. It's not so much an adventure story as it is a political and social treatise.

The majority of the book takes place during the basic infantry training of the main character "Johnny Rico". The training is extremely demanding and the book's emphasis on self discipline, personal responsibility and self improvement (mental, emotional and physical) make it a good redpill read.

The book is also very political. Heinlein was a libertarian and the book describes his view of the optimal political and social order. You may not agree with Heinlein's views but they are well reasoned and give much food for thought.

On the downside, the book is kind of dry. It's more of a lecture than an adventure. However I consider it a must read for anyone interested in both political philosophy and science fiction. Really, just about anything from Heinlein is worth it. "The Moon is a Harsh Mistress" is another good book.

Starting Strength - Mark Rippetoe

[deleted] · 21 January 2014 · Archived copy · Reddit

Starting strength is one of the best books for a beginner to barbell training to read. It breaks down each of the big six lifts, as well as copious amounts of information on biochemicals, recovery, form, etc in an easy to read format with lots of illustrations.

It is primarily for beginners to barbell training, but I think that anyone who trains with a barbell would benefit from reading it.

PRO:

- Explains the basic mechanics behind each of the six lifts
- Has a ton of information on strength related subjects such as recovery, diet, etc
- Has a lot of illustrations to help demonstrate the points
- Goes into discussion on the ways one can do an exercise, and the best way to do one, as well as discussion about important small details such as grip, chalk, etc.

CON

- Can get long. the mechanics of a lift isn't really the most interesting thing in the world, and there is a ton of information packed into the book. I recommend taking it one chapter at a time so as to maximize retention.
- This isn't really a con, but I had to put it in here because I knew it would come up: I know that a lot of people have problems with his GOMAD (Gallon Of Milk A Day) program to gain weight. You have to understand that this program is aimed at people who have problems gaining weight due to not eating enough in the first place. If you eat enough as it is, fine. GOMAD is one of the best rapid weight gaining programs out there however, and people seem to forget that its main purpose is **weight gain**.

This is one of the best books a beginner to strength training can read, with copious amounts of information in an easy to read and well illustrated format. I am going to rate this a **4.5/5**.

F**k it! The ultimate spiritual way and F**k it therapy

herebebooks · 23 January 2014 · Archived copy · Reddit

Amazon F**k it

“Maybe it's because we innately know that everything is impermanent that we so desperately cling to it. But cling we do.

We know that our youth vanishes that we and our loved one will die one day, that whatever we have accumulated can easily be taken away from us, that one day our skills might not be wanted, that a day may come when our love might not be reciprocated. But we go on clinging.

Everywhere we turn we are faced with impermanence. (..) The more we cling - of course - the more pain we feel as things fade, disappear, die around us. And sometimes the more we cling, the more these things happen. (..)

The key to being able to let go of all the stuff you're holding on to is knowing that you'll be okay if you don't have it. And that's the truth. You can survive with very little. And though the passing of people and things can be painful, you will survive.” — John C. Parkin, Fuck It: The Ultimate Spiritual Way

PDF

Amazon F**k it therapy

If every therapist and psychotherapist on the planet could repeat this to their clients, like a mantra, again and again, there would be fewer therapists and psychotherapists. Because it works. Very quickly. Realising that what you're worrying about and stressing over doesn't really matter so much in the grand scheme of things is the door to freedom and healing. And the little profanity **'Fk It' is the key to that door. Ask anyone who's come close to death, or lost someone close to them, or discovered they have a serious disease and they'll say the same thing: that the little things don't matter, Fk It...** enjoy life in every moment for what it is, not what you want it to be... worry less, live more... remember what's important and forget the rest.

AZW

Not much to add to this, aside that the books are easy and fun to read.

Obligatory shout-out to /r/hownottogiveafuck, if you like stuff like this be sure to stop by!

Oh, and really, if you like the books go support the author and buy them, well worth the \$ in my opinion.

Don of Desire Method by Charles Black: My Honest Review

benrealdealslime · 18 January 2021 · Archived copy · Reddit

It all started when I tried to give head to a girl, had no idea what I was doing due to my lack of experience and even heard her laughing in the process. I was extremely embarrassed and as someone who used to struggle with anxiety it was all i could think about for days. I came across Charles Blacks videos on youtube and eventually got the book. It gives you a step by step guide on how to handle a woman in bed from start to finish. The main takeaway is to constantly tease over her sensitive areas to build tension (makes her go crazy), do everything 10X slower than normal, and put an emphasis on foreplay (don't rush it at all). I can say that I followed everything he said on a date with a new girl and it worked perfectly. Although there are ways to find the book for free I recommend buying it because he recently got his youtube channel with thousands of subs taken down so it would be good to support him. 10/10

Unscripted: Life, Liberty, and the Pursuit of Entrepreneurship by MJ Demarco is truly a red pill book (red pill being a general idea, not dating/women specific).

Questions about the redpill sidebar and "must-reads"

AnonymousAndLovinIt · 6 January 2016 · Archived copy · Reddit

Hi.

So I've been digesting some redpill stuff on and off for a couple of years, but decided to finally eat up the daunting side-bar of redpill. Don't know why I put it off up till now.

I have a couple of questions, though. Is the order of the books there the best order to read them in? What are the "must-reads"? And what books that are "essential" that aren't on the sidebar?

I ask about it because I felt I got all I could out of Mr.Nice Guy from the first third of the book, and The Manipulated Man was too black-and-white. I have limited time, and have other things to read, so I don't want to wade through books if I'm not getting much out of it.

Any help is appreciated.

"Confessions of a Sociopath" by M.E. Thomas

syrinj · 28 January 2015 · Archived copy · Reddit

This is worth a read for those interested in the Dark Triad. No need to be put off by the fact that a female wrote it because, unlike what we'd typically expect, she writes quite objectively about life as a sociopath. She touches also on how she rejects concepts of femininity and masculinity as they would otherwise apply to her. Highly recommended read. Lots of valuable and interesting insight.

The Moon is a Harsh Mistress by Robert A. Heinlein

ProfessordelaPaz · 1 August 2014 · Archived copy · Reddit

What's it about?

The first person story of a future revolution on the moon as instigated by a cabal of masculine men and feminine women. In Heinlein's imagined future, the moon is colonized as a penal colony by Earth's (transnational) governments and used as a supply of (essentially) free grain. The revolution is managed by an ornery computer engineer, an anarchist professor (*see my username*), a beautiful agitator, and a sentient computer with a sense of humor. Heinlein provides us with a detailed and reasonably realistic imagined future in terms of both technology and (*proto red pill*) social dynamics.

Who's it for? (and not for?)

Heinlein pens hard science fiction while incorporating strong and memorable characters. A fair number of scifi fans will likely have read at least some of his work. TMIAHM is often called one of the "great libertarian novels" so, if you've come to the red pill from the left, this book may not be your favorite. I'd argue that it's frank and masculine presentation of the future make it a worthy read for even the Phil Oaks types who've swallowed the pill.

PROS:

- Heinlein is absolutely uncompromising in his description of women, yet he doesn't diminish the importance of his female characters. Examples:

Women are amazing creatures-sweet, soft, gentle, and far more savage than we are.

I don't think it matters where a man eats lunch as long as he comes home for dinner.

Thing that got me was not her list of things she hated, since she was obviously crazy as a Cyborg, but fact that always somebody agreed with her prohibitions. Must be a yearning deep in human heart to stop other people from doing as they please.

- The lunar society presented embraces personal responsibility completely. Three particular quotes:

...it is impossible to shift blame, share blame, distribute blame. . . as blame, guilt, responsibility are matters taking place inside human beings singly and nowhere else.

I will accept any rules that you feel necessary to your freedom. I am free, no matter what rules surround me. If I find them tolerable, I tolerate them; if I find them too obnoxious, I break them. I am free because I know that I alone am morally responsible for everything I do.

In terms of morals there is no such thing as 'state.' Just men. Individuals. Each responsible for his own acts.

- Interpersonal relations and life in general on the moon are rough and tumble. Residents of the moon, called "loonies" after "luna," scoff at hypersensitivity and the regimented customs of those who live and reign planet-side.

CONS:

- Heinlein's invention of a lunar dialect of English resulting from the mixing of all the Earth's exiled prisoners is arguably realistic, but can make reading a slow as the reader gets used to linguistic conventions.
- Red pillers absent nuance may think of Heinlein's male character's a pedestaling women on occasion. In reality,

these characters often comment on a woman's capacity for viciousness while acknowledging the positive complementary nature of feminine qualities.

- Elements of the book present plainly (which is good) may be off putting to those who haven't swallowed the pill and aren't quite ready to.

Final Thoughts

Put this post here because TMIAHM is my favorite work of fiction, and the inspiration for my username. It's also a great example of a hypothesized future society which is extremely red pill. If you don't like Heinlein's politics as they present here the red pill aspects of the book are worth stepping past them.

[REQUEST] Mindful Attraction Plan by Athol Kay?

LooksMatterALot · 24 September 2019 · Archived copy · Reddit

This is a fundamental book for the red-pill community and I cannot seem to find a free downloadable version of this book anywhere. The best I've found is something on Scribd, but even that is not downloadable, nor free.

Anyone have any links to this book they could provide me? Really looking to read it, and would prefer a downloadable method.

Cheers.

Make Women Great Again

berthwerm · 29 March 2020 · Archived copy · Reddit

I joined this sub at some point thinking it was a sub for 'those who want to improve themselves' and was about to post asking for female-specific recommendations. I feel like the recs on here or accounts I follow on Instagram always have material geared towards men learning to become better men.

Then I realized the title of this sub is 'Books for Men'. lol.

But, what the hell- do y'all have any life-altering titles for women? Or know of a sub for this mindset for females?

I realize a good bit of the titles mentioned here would be useful to both genders, but I am curious about more targeted material. Maybe your counterparts would have some insight?

Any books (or other resources) on treating life as a PC game?

dzastme · 10 May 2020 · Archived copy · Reddit

Hi, I am looking for books/resources about treating life as a PC game. Seeing people as NPCs, your life as a bunch of quests with smaller side quests, life events just as they are (no unnecessary feelings, overthinking and so on).

So I guess a mix of dark triad, logic, seeing things as they are (without the unnecessary background of feelings, worries etc.) and gaming? I've seen people living with this mindset and it seems very effective and liberating.

By the way I am not talking about 'gamification' which, as far as I can remember, is just a fancy way of setting goals and habit tracking.

Thanks.

"Double your Dating" by David DeAngelo

[deleted] · 15 January 2015 · Archived copy · Reddit

i know i've suggested another book on dating but i am just consumed by 'wanting to know everything', a couple of days ago i found this book, and i read it. This book has the potential to be life-changing for men. one of the things that i found useful was its dating advice, literally it was dating advice not *theories* which is always nice. it surrounds itself like things like, have a outrageous cooking apron, have 'crazy' books laying around the house, have interesting objects that create conversations with the woman/guess you are with. its very solid. i think i read the 1st edition of it, was written in 2001, and it so applicable even in today's standards, which we are like 14 years after that book was written!

yout could go to [doubleyourdating](#) oficial site and buy the book for like 20 dollars

or you could just download the PDF from [here](#) its the second edition so i am not sure if you will get the same content or if info is modified but although its longer, is around 148 pages, the chapter names look the same tho.

good look guys and read it, its fucking awesome! if books like this are out there you start to wonder how many books you've skiped over that had the potential to start your life anew.

also i've read models by mark manson and i personally think this book and models should be put together and complement each other really well.

TLDR: i am now a fan of david deangelo and mark manson.

edit:also guys if you have suggestions for me of dating books, that are 'must reads' for men starting dating. hit me with them in the comments i don't judge.

Mode One by Alan roger currie. or anything by Alan really

[deleted] · 24 November 2014 · Archived copy · Reddit

Mode One I can't fucking believe this book is not here!!! in this book alan describes the essence of what redpill game is supposed to be, it describes really **realistically** how to be a guy who becomes an 'alpha male' he states that all failure with relationships, especially with women, his focus in the book, is due to not exhibiting Mode One behaviour or genuine and honesty. I enjoyed the book and it was more **realistic** in theory and in real life, not like other books who just look good in theory, looking at you rational male. but rather realistic because Alan himself was a chump or a nice guy, aka trying to keep appearances up by being a 'gentleman' his mom raised him to be towards women, but this book is down to earth what everyman needs to have to game, he does a lot of direct game, but in all honesty his reasoning for using it is actually bomb, it essentially filters out the manipulative hoes, kinda the idea that if you state what you want from a woman she has to take it or leave it. I honestly recommend anything by Alan roger currie so far. I am reading The possibility of sex by alan and it was bomb, and the best part is that they are realistic as FUCK!, he would be someone who understands really what it means to be redpill especially with women because he just doesn't rant, like rational male, he gives first hand experience and is bomb, if you don't take my word for it, really read any other reviews in amazon to have a good opinion on the book. but in all honesty i would recommend this book as a introduce to game and redpill, also **the possibility of sex** is fucking bomb and it furthers explain why is good to have direct game, in my honest opinion should be read back to back with mode one, and avoid the possibility of sex, i also have **ooh say it again**, but i can't comment on it since i haven't read it, but being that it outsold MODE ONE, being a pretty bomb for itself, i can't wait to read that book ASAP.

edit1: link books to amazon--- so you can support the author and his books, i swear after you read his books alan is going to become your new favorite author, hands down, and i am not exaggerating you'll wonder "why didn't anybody tell me this shit before?!!!"

edit 2: i know its been like a month since i posted this but i just found a download link(i contradict edit 1 but some guys just don't have the money and this gem needs more praise), just click save file and it will download automatically. i can't emphasise this book enough its in all my honest opinion is 'must read' for men within their life-time, especially if you are working in your 'game'. **here is the link** if this book doesn't change your life or at least your way of thinking i honest to god don't know what will.

edit3: i wish alan did an AMA in reddit sometime in the future on r/seduction or something that would be fucking bomb!! i like to see how this guy thinks.

(x-post) I'm compiling a master list/study guide for learning about political theory, philosophy, and economics. Would r/redpillbooks be interested in contributing?

soapjackal · 2 March 2014 · Archived copy · Reddit

Hello everyone!

I'm trying to compile a 'master' reading list/study guide for learning about political theory, philosophy, and economics. This is a big project overall, I intend to be as inclusive as possible, and when it's completed it will no doubt need to be revised in the future. I'm posting here to request some of your suggestions.

What I'm looking for specifically:

Beginning, intermediate, and expert level books, essays, or lectures on subjects related to TRP or your own personal ideas.

2. 'Expert' material must be some form of academic material or similar level of effort/quality.
3. Please specify as precisely as you can what the material is relevant to. If you give a good description, I might, with your permission, use your description in making the final post.
4. critiques of other ideologies from the 'TRP' or whatever viewpoints you guys hold are welcome.
5. Feel free to post obscure materials.
6. Consider posting some details on the 'big themes' or 'big questions' a material is raising. They might be useful in developing the 'study guide' portion of this project, so that future readers can know what to look for.

A Note On My Editorial Discretion During This Project

As you can tell from my list, I'll be using a fair amount of editorial discretion in developing it. This isn't intended towards any particular ideology or view point, but is going to be necessary in this project. I intend it to be as extensive as possible, but I can't include *everything*.

For those interested, I'm a non-Euclidean. However, for this project it really should be irrelevant. One part of this project that excites me is getting exposed to authors I've never experienced before and exposing others to those authors.

Questions? Comments? Suggestions? Please feel free to offer them! :)

Full text: https://ia700509.us.archive.org/12/items/MightIsRight_966/MightIsRight.pdf

From the first pages:

Virtue is rewarded in this world, remember. Natural law makes no false judgments. Its decisions are true and just, even when dreadful. The victor gets the gold and the land every time. He also gets the fairest maidens, the glory tributes. And — why should it be otherwise? Why should the delights of life go to failures and cowards? Why should the spoils of battle belong to the unwarlike? That would be insanity, utterly unnatural and immoral.

Chapter 3 Transgression from the book 48 Laws of Power

Myles-Spenceley · 14 May 2020 · Archived copy · Reddit

Once the countess was confused, it would be time to make her jealous. At the next encounter, at a major fête in Paris, the marquis would show up with a beautiful young woman at his side. This beautiful young woman had equally beautiful friends, so that wherever the countess would now see the marquis, he would be surrounded by the most stunning young women in Paris. Not only would the countess be seething with jealousy, she would come to see the marquis as someone who was desired by others. It was hard for Ninon to make the marquis understand, but she patiently explained that a woman who is interested in a man wants to see that other women are interested in him, too. Not only does that give him instant value, it makes it all the more satisfying to snatch him from their clutches.

The Total Money Makeover: A Proven Plan for Financial Fitness (Detailed book review)

Good-Winter-8095 · 28 January 2022 · Archived copy · Reddit

If you want to have an stress-free life, Total Money Makeover by Dave Ramsey is the essential book to become wealthy and never worry about money again.

<https://youtu.be/24Kke7gjkME>

This book was updated in 2013 and teaches you how to get out of debt effectively, how to budget, and correct money myths.

The plan is divided into 7 baby steps that are:

1. Save a \$1,000 beginner emergency fund
2. Get out of debt using the debt snowball
3. Save a proper emergency fund that is 3-6 months of expenses
4. Invest 15% of household income for retirement
5. Save for your children's college
6. Pay off your home early
7. Build wealth and be generous

The steps that Dave Ramsey proposes have personally helped me achieve financial stability for myself and those closest to me. Many people have had success in their life thanks to The Total Money Makeover.

It's a dream of mine to have the entire library and pass them along to my children. Would take a lifetime to really read, understand and digest all of that.

Thoughts?

Just got through with "*Life at the Bottom*." Can't recommend it enough.

Building Social Dominance.

WishfulTraveler · 7 January 2016 · Archived copy · Reddit

Are there any books that focus on building social dominance?

From The Rational Male: "The highest possible male would be rich, good looking, fit, well dressed, high social cache, high prestige job (preferably one which involves risk, physical risk being better than mere monetary risk), and also extroverted, dominant, the leader of his group of friends, able to command any social situation, and so on. However women are turned on more by the latter behavioral traits than by be the former substantive traits. So, if you have to choose one or the other, to get women, be socially dominant and a broke societal loser rather than socially awkward and a rich societal winner. But best to be both if possible."

Spellgaze · 16 January 2016 · Archived copy · Reddit

I'm relatively new to RP (just swallowed it earlier this week), but I have a solid recommendation based on the reading I've done and my browsing the reading lists: William Shakespeare's "The Taming of the Shrew." The plot is 100% RP. It centers on the relationship of Katherina (the titular "shrew") and Petruchio, the man who tames her. Plus it's hilarious.

Read it With Me: Think and Grow Rich by Napoleon Hill

-This_Too_Shall_Pass · 4 September 2015 · Archived copy · Reddit

Hey everyone. I want to share with you perhaps the only book a man will need in his quest to achieve -- well -- anything. Not only should you read it, you should study it, take it with you everywhere you go, apply it, and make it part of your life.

What's it about? This book is the compilation of the principles of success and abundance of America's 500 richest and most accomplished men.

Who's it for? Anyone and everyone is looking to achieve something.

PROS

- it serves as an introduction into the metaphysical, and the "energies" we emit
- it's incredibly inspiring and energizing
- to hell with the surge of "self-help" books, written by 20-somethings who have little to know life experience. This guy was commissioned by Andrew Carnegie to interview 500 of the richest men in America -- people like Rockefeller and Edison.
- I truly believe that the consumption of this book, in the most radical sense, will make anyone who properly digests it rich and abundant.

CONS

- Hill repeats and reinforces the same principles over and over again, almost tiredly. Regardless, it's useful and necessary to enforce these principles in your mind and subconscious. Maybe I'm blinded by love for this book and the principles promoted, but I really don't see any "flaws."

Final thoughts 5. This is the only "self-help" book you'll ever need if applied correctly.

Excerpt and further reading I'm hosting a **Read-Along on my blog**. No, this is not a promotional post. Read the book and never visit my site, it doesn't affect me. I'm simply looking for discussion with others and a place to publish my stream of consciousness as I study and apply this book in my life. I want to hear your thoughts and perspectives so I can best digest Hill's work.

How to Dominate- Gary Brodsky

[deleted] · 18 February 2015 · Archived copy · Reddit

Link

Intro: A typical PUA book on approaching and seducing women, but has some very redpill tough love in it.

It starts off with a bang. (Emphasis mine):

Why do women go for "bad boys?" Why, when there is a guy willing to slobber all over himself, shining her shoes, cooking her meals, running the vacuum, et cetera, do they dump him for a jobless drug addict who beats them ... every, single time? Because they're all, deep down inside, searching for someone to dominate them. **You don't believe it? Then you're an idiot. Plain and simple.** It is the natural way of things for men to be in charge, for men to dominate all situations between a man and a woman. When a man isn't dominating a woman, telling her what to do, giving her boundaries and guidelines, she will get herself into worse and worse trouble, lashing out with ridiculous behavior until some right-thinking male takes her in hand and lays down the law.

The book goes through the motions, from inner game, to approaching women, setting up the date, and up to maintaining an LTR. His wisecracks are reminiscent of /u/GayLubeOil pushing you like a Lt. in boot-camp.

Pros: Straight to the punch and his wisecracks at the reader make you dive in to TRP without the book being TRP. It's short too. Chapters glide in, even including some more controversial topics like advising on prostitutes and gaming escorts. It tells you to man up goddammit and to be the one playing the rules. Gives good tips on keeping the upper hand in interactions and subtly asserting yourself. Another quote:

I'm talking about working on the simple things in life. "Watch my cigarettes, will you? Hey, hand me a napkin? You have a Kleenex in your purse; let me have one, will you?" Little things. There are two reasons for this. First off, you want to get her in the habit of doing things for you. You want her agreeable to your suggestions, requests, needs, et cetera. You want to get a pattern established of her doing things for you—got it? You are out to control her physically and mentally, right? Ultimately you want to be able to dominate the woman you approach in every and all ways. Well, such control comes slowly, and every little thing you can do to break down her shields, to put yourself into the driver's seat, is absolutely worth doing. The second reason for this is that you want to avoid doing things for her. Understand, once you start doing things for a woman, even the smallest things, it's only going to be a matter of minutes before her mental image of you is going to be one of you with the word loser written across your forehead in bright, metal-flake, candy red letters.

Cons: A little outdated (looks like it was written at the height of the PUA movement in the early 2000s).

My personal review: It's good and I recommend it to the red pill man, his harsh love towards the reader may put others off but I like it. His tips are straight to the point. There are parts where he does get very verbose and rambles on to make a point go through but they work most of the time.

Score: 3.9/5

Al hacerlo, muchos hombres, como mi amigo Michael, han dejado de expresar la totalidad de sus verdaderos deseos masculinos: sexualmente, emocionalmente e incluso creativamente. Se han ido juntando con el agua del baño. Han elegido, consciente o inconscientemente, expresar menos energía masculina (ser menos direccionales y exigentes, por ejemplo) que lo que les pide su esencia sexual natural.

Así, atraen a mujeres que no satisfacen el pleno deseo de su verdadera esencia sexual. Atraen a mujeres menos radiantemente femeninas de lo que realmente desean, porque expresan energía menos masculina que su verdadera esencia sexual.

La energía sexual que expresamos siempre es recíproca. Por tanto, una energía masculina débil atrae energía femenina débil. Asimismo, las mujeres salvajes y radiantes se sienten atraídas por las energías de hombres confiados y apasionados, hombres que no tienen miedo de afirmar su amor y su deseo.

Una clave de la satisfacción sexual y emocional es comportarse como dicta la propia esencia sexual. Si tu esencia sexual es masculina, no tienes otra opción que expresar libremente tu fuerza masculina o sentarte infeliz. Y para ser libremente masculino, debes sentarte libre de expresar todas tus cualidades masculinas, como la direccionalidad confiada, el deseo de soledad, la pasión por vivir al límite o el deseo de experiencias de libera-

My main issue is I don't know how to discipline him, he feels no pain! I'll spank him and he'll just laugh most the time and then I don't want to actually hurt him either because I don't get to see him all the time.

I get him about every other day or so. Absolutely can't stand it but basically I'm just yelling at him making threats I hate being that type of parent always yelling. I literally have to call his mom to yell at him over the phone to make him listen which I think is pathetic of myself.

- Claim yourself for yourself.
- What new thing is it then for a man to die, whose whole life is nothing else but a journey to death?
- I am endeavouring to live every day as if it were a complete life.
- Hold every hour within your grasp.
- Manliness gains much strength by being challenged.
- Virtue is not to be worshipped with incense or garlands but with sweat and blood.
- Happiness must depend on us, and not us on it.
- There is pleasure in being in one's own company when one has made himself worth enjoying.
- The man who can say on arising every morning, "I have lived," is the happiest.

My favorite excerpt:

Once more I stood in the round corridor, still excited by the hunting adventure. And everywhere on all the countless doors were the alluring inscriptions. ... One was: "GUIDANCE IN THE BUILDING UP OF THE PERSONALITY. SUCCESS GUARANTEED."

This seemed to me to be worth looking into and I went in at this door.

I found myself in a quiet twilight room where a man with something like a large chessboard in front of him sat in Eastern fashion on the floor. At the first glance I thought it was friend Pablo. He wore at any rate a similar gorgeous silk jacket and had the same dark and shining eyes.

"Are you Pablo?" I asked.

"I am not anybody," he replied amiably. "We have no names here and we are not anybody. I am a chess player. Do you wish for instruction in the building up of the personality?"

"Yes, please."

"Then be so kind as to place a few dozen of your pieces at my disposal."

"My pieces?"

"Of the pieces into which you saw your so-called personality broken up. I can't play without pieces."

He held a glass up to me and again I saw the unity of my personality broken up into many selves whose number seemed even to have increased. The pieces were now, however, very small, about the size of chessmen. The player took a dozen or so of them in his sure and quiet fingers and placed them on the ground near the board. As he did so he began to speak in the monotonous way of one who goes through a recitation or reading that he has often gone through before.

"The mistaken and unhappy notion that a man is an enduring unity is known to you. It is also known to you that man consists of a multitude of souls, of numerous selves. The separation of the unity of the personality into these numerous pieces passes for madness. Science has invented the name schizomania for it. Science is in this so far right as no multiplicity may be dealt with unless there be a series, a certain order and grouping. It is wrong insofar as it holds that one only and binding and lifelong order is possible for the multiplicity of subordinate selves. This error of science has many unpleasant consequences, and the single advantage of simplifying the work of the state-appointed pastors and masters and saving them the labors of original thought. In consequence of this error many persons pass for normal, and indeed for highly valuable members of society, who are incurably mad; and many, on the other hand, are looked upon as mad who are geniuses. Hence it is that we supplement the imperfect psychology of science by the conception that we call the art of building up the soul. We demonstrate to anyone whose soul has fallen to pieces that he can rearrange these pieces of a previous self in what order he pleases, and so attain to an endless multiplicity of moves in the game of life. As the playwright shapes a drama from a handful of characters, so do we from the pieces of the disintegrated self build up ever new groups, with ever new interplay and suspense, and new situations that are eternally inexhaustible. Look!"

With the sure and silent touch of his clever fingers he took hold of my pieces, all the old men and young men and children and women, cheerful and sad, strong and weak, nimble and clumsy, and swiftly arranged them on his board for a game. At once they formed themselves into groups and families, games and battles, friendships and enmities, making a small world. For a while he let this lively and yet orderly world go through its evolutions before my

enraptured eyes in play and strife, making treaties and fighting battles, wooing, marrying and multiplying. It was indeed a crowded stage, a moving breathless drama.

Then he passed his hand swiftly over the board and gently swept all the pieces into a heap; and, meditatively with an artist's skill, made up a new game of the same pieces with quite other groupings, relationships and entanglements. The second game had an affinity with the first, it was the same world built of the same material, but the key was different, the time changed, the motif was differently given out and the situations differently presented.

And in this fashion the clever architect built up one game after another out of the figures, each of which was a bit of myself, and every game had a distant resemblance to every other. Each belonged recognizably to the same world and acknowledged a common origin. Yet each was entirely new.

"This is the art of life," he said dreamily. "You may yourself as an artist develop the game of your life and lend it animation. You may complicate and enrich it as you please. It lies in your hands. Just as madness, in a higher sense, is the beginning of all wisdom, so is schizomania the beginning of all art and all fantasy. Even learned men have come to a partial recognition of this, as may be gathered, for example, from Prince Wunderhorn, that enchanting book, in which the industry and pains of a man of learning, with the assistance of the genius of a number of madmen and artists shut up as such, are immortalized. Here, take your little pieces away with you. The game will often give you pleasure. The piece that today grew to the proportions of an intolerable bugbear, you will degrade tomorrow to a mere lay figure. The luckless Cinderella will in the next game be the princess. I wish you much pleasure, my dear sir."

I bowed low in gratitude to the gifted chess player, put the little pieces in my pocket and withdrew through the narrow door.

Call of the Wild - Jack London

Although the book is already public domain since Jack London died in 1916 i included the amazon link for those interested in a physical copy

[Amazon buy link](#)

[PDF Link](#)

What's it about?

A wolf raised in the safety of american white people life is sold to Men in the Klondike Gold rush and has to adjust to the harsh labour and lifestyle expected from him while competing with fellow dogs and the unknown of the wild.

Who's it for?

Any Man who has left the safety of the female Den. I will read this to my kids once they reach age 6. Both male and female may benefit from this fiction. The telling is targeted more on boys though.

If you are looking for an analogy to describe the male world or introduce the concept of the survival of the fittest in and to males, it can also be very helpful to cite this book.

PROS

It reads as a tale and therefore bypasses any walls and has little to no emotionally charged words for the reader.

It's also very short. About 85 pages.

CONS

May not be for males too deep in the social matrix already.

Final thoughts

4/5 Jack London packs the Life of Men into a story about a wolf being raised in ignorance(by the female) and put into a situation of the Survival of the fittest(to the male) and his way to learn this totally new way of living.

EDIT add: It also shows lessons of dog to keeper love and its dynamic.

Excerpt

When he saw Pike, one of the new dogs, a clever malingerer and thief, slyly steal a slice of bacon when Perrault's back was turned, he duplicated the performance the following day, getting away with the whole chunk. A great uproar was raised, but he was unsuspected; while Dub, an awkward blunderer who was always getting caught, was punished for Buck's misdeed.

This first theft marked Buck as fit to survive in the hostile Northland environment. It marked his adaptability, his capacity to adjust himself to changing conditions, the lack of which would have meant swift and terrible death. *It marked, further, the decay or going to pieces of his moral nature, a vain thing and a handicap in the ruthless struggle for existence. It was all well enough in the Southland, under the law of love and fellowship, to respect private property and personal feelings; but in the Northland, under the law of club and fang, whoso took such things into account was a fool, and in so far as he observed them he would fail to prosper.*

Not that Buck reasoned it out. He was fit, that was all, and unconsciously he accommodated himself to the new mode of life. All his days, no matter what the odds, he had never run from a fight. But the club of the man in the red sweater had beaten into him a more fundamental and primitive code. Civilized, he could have died for a moral consideration, say the defence of Judge Miller's riding-whip; *but the completeness of his decivilization was now evidenced by his ability to flee from the defence of a moral consideration and so save his hide.*

He did not steal for joy of it, but because of the clamor of his stomach. He did not rob openly, but stole secretly and cunningly, out of respect for club and fang. In short, the things he did were done because it was easier to do them than not to do them.

His development (or retrogression) was rapid. His muscles became hard as iron, and he grew callous to all ordinary pain. He achieved an internal as well as external economy. He could eat anything, no matter how loathsome or indigestible; and, once eaten, the juices of his stomach extracted the last least particle of nutriment; and his blood carried it to the farthest reaches of his body, building it into the toughest and stoutest of tissues.

Sight and scent became remarkably keen, while his hearing developed such acuteness that in his sleep he heard the faintest sound and knew whether it heralded peace or peril. He learned to bite the ice out with his teeth when it collected between his toes; and when he was thirsty and there was a thick scum of ice over the water hole, he would break it by rearing and striking it with stiff fore legs. His most conspicuous trait was an ability to scent the wind and forecast it a night in advance. No matter how breathless the air when he dug his nest by tree or bank, the wind that later blew inevitably found him to leeward, sheltered and snug.

And not only did he learn by experience, but instincts long dead became alive again. The domesticated generations fell from him. In vague ways he remembered back to the youth of the breed, to the time the wild dogs ranged in packs through the primeval forest and killed their meat as they ran it down. It was no task for him to learn to fight with cut and slash and the quick wolf snap. In this manner had fought forgotten ancestors.

They quickened the old life within him, and the old tricks which they had stamped into the heredity of the breed were his tricks. They came to him without effort or discovery, as though they had been his always. And when, on the still cold nights, he pointed his nose at a star and howled long and wolf-like, it was his ancestors, dead and dust, pointing nose at star and howling down through the centuries and through him. And his cadences were their cadences, the cadences which voiced their woe and what to them was the meaning of the stillness, and the cold, and dark.

Thus, as token of what a puppet thing life is, the ancient song surged through him and he came into his own again; and he came because men had found a yellow metal in the North, and because Manuel was a gardener's helper whose wages did not lap over the needs of his wife and divers small copies of himself

Sexual Harassment Or Flirting (know The Difference)

satorivalencia · 30 September 2020 · Archived copy · Reddit

One of the main reasons why approaching or interacting with women can be very dangerous is because there is a possibility of being accused of sexual harassment if the woman we are interacting with considers our actions as inappropriate.

Many men are afraid to approach or interact with women because they are afraid of being labeled as sexual predators or going to jail over false accusations. If you want to avoid that problem and prevent sexual harassment accusations, you need to learn how to read face expressions, body language and voice tonality in order to determine if the woman that you are approaching or interacting with is sexually attracted to you or interested in romance.

Reading indicators of interest (IOI) is the key to avoid sexual harassment complaints or misunderstanding with the women you are trying to seduce.

I think women fundamentally changed and I don't know what to do

Serious_Juice_4475 · 21 March 2023 · Archived copy · Reddit

I'm male 24 years old and I would like to share my recent "not so pleasant" experience in hopes I find better perspective, advice or confirmation on the matters.

In primary school I was a very shy guy with opposite gender, who despite having some relationship "requests" from girls around me, I didn't know how things work - so I always declined.

In high school I decided to take fate into my hands and built up my worth - to being able to have first sex/relationships - successfully.

As years went by I studied seduction a bit, worked on my character, fashion, and despite being kind of insecure in my self-love/self-respect, I've been able to fake it till I made it and somehow pulled off relationships with 3 pretty women in a row (across like 4 years)

Even after high school I had reasonable success in dating.

However, I observed a huge cultural / mental shift in women over the years. I suppose due to feminism? I mean It's on every podcast, every radio song, the values of independence and songs about "walk away from men".

I never liked red pill, I found it at points strange and contradicting. But as years go by - IF me as a male "on his peak" (so far) who had a lot of previous success with women, can't find a single one who's committed to speak for more than 5 minutes before ghosting you.. I guess I'm red pill too.

It's getting really bad and I don't know where to find the type of women "I used to date" when It was 7/8 years ago. There used to be this meme that men only want sex but nowadays it's women who will ghost you after dating and 2 nights of sex and claim they need independence (f*ck another guy).

I love women and I care about their well being too, but wtf has happened? I changed nothing besides climb in my career and become even more self/loving and respecting (confident), able to communicate, yet I went from dating pretty women all the time, to "0" across like entire year.

I found that modern women are trying to keep distance while keeping doors half open for like 30 of guys. It's all attention game, It's all fake, It's all bullshit and in the end she'll make it your fault. Online they never ask you questions, only one word responses, they never text first, they never show any care or interest in you or anything remotely meaningful (no matter how funny, serious or confident)

No matter what you strategy go with, they always look down on you, not as a consequence of higher competence (quite the opposite) but a personal insecurity combined with having 100s of options and going for the ONLY guy she won't ever pull off.

If you're female don't take this personally, it may not be you but it's my honest observation, and of many guys I know, women are being programmed by toxic culture to disrupt the harmonious union of sexes.

How can I find "normal" unspoiled women, in a country of almost no religion and 100% modernity?

The Perfect Kill: 21 Laws for Assassins

JChristOnIce · 11 December 2014 · Archived copy · Reddit

Not only does this book provide a thrilling historical account of political maneuverings in the middle east, but it also provides laws which can be applied to situations in the real world including with friends and coworkers. For instance, one law for assassins is "Don't shoot everyone in the room." An assassin shouldn't needlessly cause violence because he doesn't want to needlessly piss people off. A group with little power would kill everyone in an attempt to instill fear. A powerful group on the other hand would kill its intended target with purpose and then leave. The book contains many more applicable examples in the guise of an historical espionage account.

Notes from David Shade's Why women Cheat

Birdoftruth · 22 September 2014 · Archived copy · Reddit

I took notes on this audio program and figured people here could get some use out of it

****must feel special and appreciated:**

-Must defend her if someone says something offensive to her. "I can imagine your really mad she is being a bitch. That makes me mad, she is a bitch.

-Don't tell her what to do.

-Don't hit on other women when you are around her, it will not make her feel special

-Being monogamous will make her feel special

-Tell her you appreciate her but you must absolutely have to back it up with action or else it dilutes everything else

-Must reward her and validate something she does which puts her in a position for you to show her you appreciate her

-You must tell her how she is unique and different from every other woman

****must have emotional connection**

-Some guys don't open up for one reason or another

-It is a communication channel that is rapport

-A woman gets emotional gratification from emoting to you...It makes her feel good. It has to be a two way street. So a man must share his emotions with her. But it must be shared in a masculine way which they can be vulnerable to and not be shot down for but instead be validated by her giving emotional support. But she shouldn't be your therapist

-Women love that you are a masculine man but when you are with her you are somewhat exposed

****she must feel: feminine, beautiful, and sexy**

-It is a man's masculinity that brings out the girls femininity. A man must plan the date and the woman must not have responsibilities

-Tell her how beautiful she is to you

-You must be a sexual threat...when you are out with her, she's wondering what you have in store for her when you get home

****must have hot passionate sex**

-A man must stimulate her mentally

-Realize she is sexually submissive

-A woman should be seduced long before the bedroom so she is ready to be taken advantage of

-A man must dirty talk her

-A man should be seducing her all day

-Don't sink into a pattern and do something slightly different each time...Occasionally do the I love you's in sex. It must be a random challenge to her.

-A lot of time a girl will get off by riding him and rub her clitoris on his pubic bone and that is just masturbating on his cock

- You must give her a vaginal orgasm in intercourse or you have nothing
- Go over Power of female sexuality, change belief systems in cure nice-guy (this is a huge one)
- Go over touch her touch there...Give women wild screaming orgasms
- In the bedroom you must lead your woman...Go over sexual power and influence

If a girl has these 4 things and [b]you selected the woman wisely[/b]...Than she will not risk it because she would be stupid.

[My notes: He has a program called select women wisely which basically goes over how to screen for a psychologically healthy woman. So In essence, you can do all these things correctly, but if you fucked up from the beginning by getting the wrong girl, your fucked] High self-esteem women will even cheat if this stuff is not met.

some couples get married too early and won't get in touch with what they really need until later in life. If they get married too early she may pick the wrong thing in a husband.

[b]In all cases where a woman left, she lost respect for the man.[/b]

It is a recurring theme throughout manosphere thought that there should a centering of one's life around a worthy, lofty pursuit (notably NOT women). A mission as it were. I agree with this wholeheartedly. I realize that I could start with a buffet approach, taking a dallop of every vocation or hobby until something emerges as a "best fit". But I'm curious if there is any detailed, manosphere literature (read, more than a solitary blog post) which gives a systematic, comprehensive treatment to this topic?

A concise and powerful book on (mostly) inner game.

Quote from the intro:

Decide what you want and go get it. Somebody recently asked me what I want for my children. I want my kids to have enough confidence to do what they want with their lives, and to be happy. Isn't that what you want? I'm on the road of life, and I know where I'm going. If she wants to come with me, then she is welcome. I'm not going down her road, I'm going down my road. When I'm talking to a woman, she is in my restaurant, looking at my menu. And the menu isn't going to change, unless I want it to change.

"All beings so far have created something beyond themselves; and do you want to be the ebb of this great flood and even go back to the beasts rather than overcome man? What is the ape to man? A laughingstock or a painful embarrassment. And man shall be just that for the overman: a laughingstock or a painful embarrassment. You have made your way from worm to man, and much in you is still worm. Once you were apes, and even now, too, man is more ape than any ape.

"you must be ready to burn yourself in your own flame; how could you rise anew if you have not first become ashes?"

"There is more wisdom in your body than in your deepest philosophy."

"But the worst enemy you can meet will always be yourself; you lie in wait for yourself in caverns and forests. Lonely one, you are going the way to yourself! And your way goes past yourself, and past your seven devils! You will be a heretic to yourself and witch and soothsayer and fool and doubter and unholy one and villain. You must be ready to burn yourself in your own flame: how could you become new, if you had not first become ashes?"

"You say 'I' and you are proud of this word. But greater than this- although you will not believe in it - is your body and its great intelligence, which does not say 'I' but performs 'I'."

trp teachings in beautiful metaphors.

Best Self esteem book?

skskya · 30 June 2020 · Archived copy · Reddit

Hi everybody, I m new in this sub. I ve recently read the rational male by Rollo Tomassi and I really liked it. I tried to change my beahviour after reading that book, and I found out that I ve a lot of ego and a not so much self esteem. I hate this thing because usually I need approval and my focus isnt to the person I speak to, but I always try to give myself value. So I'd like to know which book I should read (or any other thing I should do) to grow self esteem. Thanks a lot!

An Autobiography by Theodore Roosevelt

NoMiddleGrounds · 1 May 2018 · Archived copy · Reddit

Love him, or hate him. This man's character was that of a true man. He refused to listen to naysayers and always chose to do things his way.

Theodore Roosevelt was born a sickly child with poor physical condition, nearsightedness, and asthma. His own father saw the condition of his son and told him these words.

“Theodore, you have the mind but you have not the body, and without the help of the body the mind cannot go as far as it should. **You must make your body.** It is hard drudgery to make one's body, but I know you will do it.”

After hearing those words out of his father's mouth he took it to heart. He conditioned himself by lifting weights, hiking, walking, and living what he called “Strenuous Life”

Theodore got bullied a few times from some older kids and you know what his response was? He took up boxing lessons. Every problem he had in life he tried to fix by making himself better, and that's what makes Theodore Roosevelt a man.

Theodore Roosevelt's mother and wife died on the same day.

At 3 A.M. Theodore Roosevelt lost his mother from typhoid fever. Just 11 hours after the death of his mother, his wife died from..... *Continued on <http://nomiddlegrounds.com/lessons-from-theodore-roosevelt/>*

Reclaim Control of Your Mind

siemanko23 · 1 November 2022 · Archived copy · Reddit

The world has gone **mad**. My generation was brainwashed and programmed to believe everything the news or Twitter tells us is fact. The younger generation will only get worse. Already, fundamental books that open one's mind and give them the ability to be an independent thinker and not conform to the media's insanity, are not taught. My siblings, only 7 years my younger, have never heard of "*The Giver*" or "*Animal Farm*". I'm starting this club to continue the education of my peers and open the minds of the youth. The education system has **failed** us, but that is **no excuse**.

Twitter, TikTok, Instagram, Facebook, YouTube, all **poison** our minds daily. Our generation was convinced this is normal. Snippets, pictures, and headlines trickle into our brain and tell us what to think. They destroy attention spans, individual morals, traditions, and creative thinking. The goal of this club is to get our generation and the next to come together and **reclaim our minds** and our thoughts.

We begin our first book tomorrow, November 1st. Join us! Let's start off our month right, and reclaim control of our minds.

Best website w/ free articles to become an alpha, (for free no paying no bs)THE POWER MOVES

Skinny_-_Cartman · 24 April 2023 · Archived copy · Reddit

<https://thepowermoves.com/high-power-behavior/>

Last year I came across this website by chance, and I got to say it was definitely LIFECHANGING. The website shows you how to be more dominant, masculine and higher value via free articles and a forum. (The link above will take you to an article that will tell you how you can become a dominant man.)

If you dont believe me you can go and try It out yourself for free: NO subscriptions, NO need to register, NO giving your email, NO giving phone numers, NO limits for the articles you can read per day, NO bs,

The free articles and forum themselves are REALLY, REALLY useful and definitely will change how you see social interactions and how you behave (if youre willing to put on the work, and GRIND for your success of course) without the need to pay a cent.

However the best part of the website are the courses, I know what your thinking. "Here It comes, the same bs Ive heard again and again". (Dont worry bud, there are LOTS of free articles and you wont need to pay to see significant change)

So you DONT have to pay to get them if you dont want to, however if you get them youll growth rate will increase exponentially and youll be able to write any doubts you may have in the forum where other course members may be able to respond to you as well. The courses basically guide you throw the whole process of becoming a high value man in order to get the relationships, status and respect YOU DESERVE.

Don't just read, TAKE ACTION!

gregswierad · 23 April 2019 · Archived copy · Reddit

Hey guys,

I stumbled upon this group while I was looking for more book recommendations, and I must say i really like what this is about. A few years ago I became crazy about my growth and started to read a lot of books. Mostly audiobooks. Somewhere around one book weekly.

Back then I got this problem - I read so many books, but I have not time to put them to the action. I got the feeling, that I have enough knowledge, and I'm just lazy to do anything with it.

It was then I decided to do something about it ... and I made a mobile application, later called HabitCoach.

HabitCoach - Turn books into actions.

I created a company, and currently, we have quite a few books. But most importantly, in HabitCoach you will find over 1000 different actions from those books.

My goal is not to advertise this app, but just to tell you about it. Spread awareness. AS this app is helping me a lot with the development of my skills, I'm sure it might be helpful to you. For example, currently I practice Charisma Myth, sometimes I go through The Way of Superior Man, and some business books.

In order to have access to all content, the PRO version is required and it costs something. However, I will give you the PRO version for free ... or almost for free - there are many smart people here, so I would love to get some feedback from you. So, if you install the app, and tell me how we can make it better, some suggestions, bug reports, I will give you the PRO version for free for at least one month.

To install it, look for HabitCoach (written together) on Google Play or App Store.

Here is the link to the app: <https://www.habitcoach.app/>

All best fellow!

I'm looking for novels with smart and/or suave alpha characters. I mostly see them in movies. The most concrete example I can think of is Kevin Spacey's character in House of Cards. He's a total dark triad, but he is so cool and refined about it.

Character's like Leonidas in 300 are not really what I'm looking for.

Any suggestions? Bonus points if it's sci-fi.

How to "Meditate" on a Book

anglissj · 11 August 2016 · Archived copy · Reddit

If you are like me, you fall into the trap of reading a book merely for the accomplishment of it. Like collecting. Some people enjoy accumulating tools for their workshop, others clothes for the closet. Me, I enjoy collecting books and placing them on my bookshelf.

The vain part of me (a bigger part than I would wish to admit) looks at a bookshelf like the tangible resume of my mind. "This shelf represents my knowledge." I think to myself. "Notice how large the theology collection is. Admire the many history books that I've obtained." When I visit others, I examine their bookshelves as well—not out of curiosity of the books themselves, but in inspection of their own intellectual resumes. And likewise, when others come by, I happily show off my own bookshelf to them, so that they may recognize my deep and extensive knowledge.

What a foolish attitude!

Of course, I tried my best to be tongue-in-cheek with my description. But still, there is truth to it. I too often love reading for the swagger and pride (and delusion) of accomplishing a subject, not for the joy and pleasure of learning and growing. I falsely call myself "well-read" because I believe I have read a wide-range of pertinent subjects. Yet, that is hardly the case. The Greeks had a word for people like me, that is, fools who thought they were wise because they learned just barely enough of some things to think they knew everything about all things. The term they used was, sophomore. The wise-fool.

So, I am hoping to bring about a shift in my personal theory of reading. Instead of reading a book once, patting myself on the shoulder, and putting the book on the shelf like a trophy of my intellect, I will instead seek to take the advice of Mortimer J. Adler in his work, *How to Read a Book*. I will not only read a book, but I will also meditate on it.

How funny that this is the very advice that God gave His people after giving them His own book! Of course the great Author of the Universe would recognize that, in order for a book to have its full effect, it must not only be read, but meditated upon as well.

As I look back on my own, albeit inexperienced, life, I realize that there are two main practices of meditation that I have encountered—each from one of my grandfathers. What they have taught me, in addition to Adler's, *How to Read a Book*, I would like to pass on to you.

Is there a way to know you created a alpha widow after you break up with her?

Kjl951996 · 3 December 2021 · Archived copy · Reddit

I Read some of the book "Rational Male" and he brings up the Alpha widow. I always hear of the signs of when you are dating one. Are there any signs from your previous relationships that she will become a alpha widow after you leave her?

For example, I'm a 25 year old male who recently broke up with a gf who I dated for 4 years and knew for 5 years. She was in love with me, obsessed with me and worship the ground I walked. She had a small circle with a very low body count and always saw us getting married. She was very submissive to me and always followed my lead. I am a fit attractive male with a business, nice apartment, and would consider myself above average or someone who stands out from the crowd. Could that set the bar so high that it's going to be harder for her to date other men. I can put more details about it but I want to keep this short and to the point

Do you think some of those elements I talked about is enough to know that a girl is set up to be a alpha widow after you leave her? Btw It's not like I'm hoping she's a alpha widow and that she will forever not let go of me, I'm just using me as pure example so you can understand the question.

The AutoBiography Of Andrew Carnegie - By Andrew Carnegie: One of the greatest businessmen to ever live

NoMiddleGrounds · 18 April 2018 · Archived copy · Reddit

This autobiography seems like it was specifically written for the up and coming Young man. It will encourage and inspire. All the way from his child hood to late adult life, this biography covers what Mr.Carnegie believed to be the most important parts of his life, Particularly his child hood which began in poverty. In one of the most memorable portions, He recalls his first promotion as a lowly paper boy and how he kept his raise a secret with his brother. Words were never truer spoken when he said to his brother that their mother and father would never have to worry about money again. A great read and by far one of the best autobiographies available.

This book is for you, if you refuse to be anything less than the man you choose to be.

PROS- Great rags to riches story with extreme detail and emotion that anyone can relate to

CONS- Some of the ideas on business and how to manage a company may be outdated and not very useful to follow in modern times.

Final Thoughts- I enjoyed this book profoundly, read it several times over, and have yet to find an autobiography that is so compelling and strong. regardless of what you think about Mr.Carnegie, when you hear his words, you know they are sincere and written in a very relatable fashion

"The first man gets the oyster, the second man gets the shell" -Andrew Carnegie

My conclusion after reading red pill books

Preslee_650 · 1 April 2023 · Archived copy · Reddit

I've read a bunch of red pill books (rational male book 1 & 3 & 5, unplugged alpha, women deserve less, way of men, no more mr. Nice guy, mode one) and put in my 10,000 hours of consuming red pill content so the ideas would really take root in my mind.

In doing this I've come to a conclusion at a certain point you'll notice all the red pill books begin to repeat the same ideas which makes sense. In noticing that I realized that what the red pill is advocating for is common sense knowledge.

The message is simple, have some damn self respect, don't tolerate disrespect from anyone, stand up for yourself, don't put anyone on a pedestal, be confident, work hard, be willing to walk away from anything, be the best version of yourself, treat others with kindness but maintain your backbone, sharpen your social skills, and don't act like your walking on egg shells around women (examples-tease them, disagree, don't tolerate disrespect, walk away if you don't vibe with them, etc)

Leave a comment and let me know what you think.

Men and Women Behavioral Differences

YuzhenLiu · 6 August 2023 · Archived copy · Reddit

Male brain is compelled to do scoring and solitary work.

Female brain compelled to communication and emotional connection

The male mind prioritizes achievement.

The female mind prioritize on relationship

Men are addicted to Porn

Women are addicted to Romance novels

Men want sex and body.

Women want love and relationships.

Males' primary attraction switches are visual.

Women's primary attraction switches are behavioral.

Men are motivated when they're needed.

Women are motivated when they are cherished.

Guys focus on facts and stats over emotions. They say things like, "Well, I've been to 5 countries, I have this car, I run a successful business, I'm a doctor, etc."

Women don't connect with facts and stats. They connect with emotions. I feel upset, I feel made, I feel overwhelmed, I feel nervous, I feel the pressure.

Men give love to get sex.

Women give sex to get love

The man likes to be the rescuer. The male fantasy is reducing the helpless virgin from the hands of the dragons.

The woman likes to be the fixer. The female fantasy is to convert a rebellious bad boy into someone who only commits to her because she's special and changed him.

Men pay attention to youth and beauty,

Women pay attention to wealth and status.

Men mock each other socially, but they don't mean it.

Women compliment each other to social, but they also don't mean it

Men compliment women to get sex, but they don't mean it.

Women compliment men during sex, but they don't mean it.

Women: "Women fuck who they want, men fuck who they can. Remember that."

Men: "Men marry who they want, women marry who they can. Remember that too."

Males pursue "the first one"

Females pursue: "the only one"

Women marry believing that their husbands will change. Men marry believing that their wives will not change.

They are both wrong.

Men define a woman with a good sense of humor as someone who laughs at their jokes. Women define someone whom she's attracted to as humorous. In another word, she first becomes attracted to the guy, then she finds everything he says funny. (Giggling girl picture come to mind)

Men value power, competency, efficiency, and achievement, their sense of self is defined through their ability to achieve results. They experience fulfillment primarily from success and achievements and achieving those goals by themselves.

It's hard for a man to have sex with a woman at first, but it gets easier each time afterwards. It's easy for a woman to have sex with a man at first, but it gets harder each time afterwards.

I once read in a finance book: "My wife would leave me if I lost all my money, I'll trade her in if she gets fat."

A man wants to divorce his wife after he makes a fortune, a woman wants to divorce her husband if he doesn't make a fortune.

"Do you still love me?" This sentence is asked by the woman several times on each occasion of: "she kisses the man for the first time, is touched by the man for the first time, goes to bed with the man for the first time, and when the man makes a fortune.

"Do you still love me?" This sentence is asked by men several times on each occasion of: "He failed to kiss her for the first time, failed to touch her for the first time, failed to go to bed with her for the first time, and when he enters a low trough in his career.

A man would borrow to feed his wife Before marriage, a woman would borrow to feed her husband after the marriage.

A woman is worried when her man couldn't make a fortune, a woman is regretful after her man makes a fortune.

The smartest girl is still confounded about her look, the stupidest guy is still sober about a girls' look

When a woman says: I know im ugly. A man needs to strongly disagree. When a man says: " I know I'm a loser. A woman needs to strongly disagree.

Men always think about sex, women always think about love.

The best way to get a girl is to tell her: I'll take the responsibility for you. The best way to get a man is to tell him: I need you to take responsibility for me at all.

For males, Being able to accomplish things without the help of others is a feather in their cap, While for a woman, when someone assists her, having a supportive relationship is a feather in her cap.

When guys get together, they talk about girls and money. When females get together, they talk about boys and beauty. Money and beauty which are all the foremost traits that the opposite sex values as mating value.

A study shows that when going on a blind date, a girl's biggest fear is the guy's a serial killer, a guy's biggest fear is the girl is fat.

When it comes to showing off, men prefer achievements, status and wealth. That's why in their social media are their professional results, matches, cars, competition wins. Women prefer things that show Beauty, love and enjoyment. Their social media are their lipsticks, life, romantic love, shopping, makeup, outfits.

There's this saying that sums everything up. Men's wisdom is used to conquer the world, women's wisdom is used to conquer men.

The main function of the male brain is the build systems, while the main function of the female brain is empathy. Men are more rational and women are more emotional. The systematic ability of men is a necessary condition for

inventing and manufacturing tools.

Women's empathy improves women's ability to communicate and understand emotions, such as anticipating and understanding the needs of babies, or making friends or seeking companions in a new environment, because it's much harder for women to survive on their own than man.

The reason why autistic patients are mostly male is because autistic patients have "super male brains" and are very good at systematization, but they have poor empathic ability, thus handicapped in interacting with other people. If someone in a family suffers from autism, then these families can easily train physicists, engineers and mathematicians. Because these professions require a high degree of systematic ability, this seems to explain why most scientists and engineers are male and most females are nurses or kid teachers.

Roy U. Schenk and John Everingham - Breaking the Shackles

manofdepth · 28 May 2014 · Archived copy · Reddit

Roy U. Schenk and John Everingham - Breaking the Shackles

This is a republication of a book titled: Men Healing Shame

This was written by over 20 Men involved in the Men's movement.

I recommend this book because it helps you to understand the sort of tactics Women, Men and Society uses to belittle and keep Men in their holes.

Shame is an emotion/state which is hard to pinpoint as it is in fact so abstract. Shame could be said to have no footing in reason.

If a person simply states: "You're a loser"; there is no basis for it, it's just an empty statement, which, for some reason may or may not affect us.

This book attempts to give an image on this problem and resolve it by simply being able to recognize shaming tactics used by people.

Again, this book was written for Men by Men.

If you want to hold a stronger shield, this is a book you need.

You can get it for free on this website: [PDF File](#)

Ken Kesey's 'One Flew Over the Cuckoo's Nest'

Mikesapien · 7 April 2014 · Archived copy · Reddit

To anyone who has not yet read this classic (or seen its multiple-award-winning film), I highly advise giving it a look.

Following the almost exclusively male Beatnik movement of the 1950s, and preceding the Second-Wave Feminism of the 1960s, Kesey's 1962 novel was ahead of its time. It predicts the feminization and sterilization of Western society, and foresees society's attempts to suppress masculinity through forced conformity in American institutions.

OFOTCN presents a social and sexual ideal: the drinkin', smokin', swindlin', gamblin', fightin', swearin', fuckin' alpha-male Irish "bull goose" Randle Patrick McMurphy. His particular expression of masculinity and maleness are treated by Nurse Ratched as a form of mental illness for which he is effectively tortured and killed.

The novel's narrator, "Chief" Bromden, must also explore his male identity following the trauma of his time in World War II (from which he actively dissociates through extensive hallucination and paranoid delusions) and his mixed parentage (an alcoholic Native American chieftain father and a socially-prestigious white mother). McMurphy helps Bromden rediscover his manhood and "builds him up" again. Though the narrative is stereotypical, it serves a useful literary purpose.

McMurphy distinctly summarizes Ratched's brand of power-mad, neurotic misandry in three b-words: "bitch," "buzzard," and "ball-cutter," which I'm sure many of us agree apply to today's strain of feminism. Though very much a product of its time, *One Flew Over the Cuckoo's Nest* was prophetic enough to apply fifty years later, and we would all benefit by considering its message today.

tl;dr - Read **this**.

Playing to Win - David Sirlin: A RP-esque guide to life outside of women

aRedLlama · 28 January 2014 · Archived copy · Reddit

PLAYING TO WIN, by **DAVID SIRLIN** This write-up is about how not to be a "Scrub" in gaming. It teaches the reader to ignore arbitrary scrub gaming complaints such as "cheapness" and to play a game by the actual rules and constraints of the game - not fictional "honorable" rules that are not codified anywhere inside the game.

If you put aside the fact that he's using video games as his primary example (the author is a game programmer), you can see that his argument applies to every facet in life. Under this paradigm, you can clearly see that Alphas are the "pro gamers", that play the game of life under the real-world constraints that actually apply. Betas are the "scrubs" that play life under some bizarre set of rules that they only wish applied.

The target audience is primarily the common video game player who wants to up their game. Those that can extrapolate the lessons dictated to life in general will pull some valuable RedPill-esque wisdom. In his write-up, Sirlin drives the point home by successfully using examples outside of video gaming to provide humorous (Neville Chamberlain and Star Trek: Voyager?!) but legitimate context. This concept is a critical one to understand, particularly when presented outside of the Red Pill sexual strategy perspective – and it's easy to do so when presented in this pithy, quickly-readable way.

Excerpt:

Introducing...the Scrub

In the world of Street Fighter competition, there is a word for players who aren't good: "scrub." Everyone begins as a scrub---it takes time to learn the game to get to a point where you know what you're doing. There is the mistaken notion, though, that by merely continuing to play or "learn" the game, that one can become a top player. In reality, the "scrub" has many more mental obstacles to overcome than anything actually going on during the game. The scrub has lost the game even before it starts. He's lost the game before he's chosen his character. He's lost the game even before the decision of which game is to be played has been made. His problem? He does not play to win.

David Sirlin did formally write a book about this concept, but appears to be more about gaming and as such may be a bit much for the purposes of a red-pill.

The formal book can be found here: **PLAYING TO WIN: BECOMING THE CHAMPION**

Beyond Good and Evil, by Friedrich Nietzsche

[deleted] · 9 February 2014 · Archived copy · Reddit

Link: http://www.lexido.com/EBOOK_TEXTS/BEYOND_GOOD_AND_EVIL.aspx

Quotes:

- Objection, evasion, joyous distrust, and love of irony are signs of health; everything absolute belongs to pathology.
- Independence is an issue that concerns very few people—it is a prerogative of the strong. And even when somebody has every right to be independent, if he attempts such a thing without having to do so, he proves that he is probably not only strong, but brave to the point of madness.
- Mature manhood: that means to have rediscovered the seriousness one had as a child at play.
- Ultimately, it is the desire, not the desired, that we love.
- Is life not a hundred times too short to be bored in it?
- In man, creature and creator are united. In man, there is not only matter, shred, excess, clay, mire, folly, chaos; but there is also the creator, the sculptor, the hardness of the hammer, the divinity of the spectator, and the seventh day. Do you understand this contrast?
- If we must have virtues, we shall have only those which have come to agreement with our most secret and heartfelt inclinations, with our most ardent requirements.
- The discipline of suffering, of great suffering—do you not know that only this discipline has created all enhancements of man so far? That tension of the soul in unhappiness which cultivates its strength, its shudders face to face with great ruin, its inventiveness and courage in enduring, persevering, interpreting, and exploiting suffering, and whatever has been granted to it of profundity, secret, mask, spirit, cunning, greatness—was it not granted to it through suffering, through the discipline of great suffering?
- The great epochs of our life are at the points when we gain courage to rebaptize our badness as the best in us.
- Let us acknowledge, without prejudice, how every higher civilization hitherto has originated! Men with a still natural nature, barbarians in every terrible sense of the word, men of prey, still in possession of unbroken strength of will and desire for power, threw themselves upon weaker, more moral, more peaceful races (perhaps trading or cattle-rearing communities), or upon old mellow civilizations in which the final vital force was flickering out in brilliant fireworks of wit and depravity. At the beginning, the noble caste was always the barbarian caste: their superiority did not consist first of all in their physical, but in their psychical power—they were more complete men (which at every point also implies the same as “more complete beasts”).

How to dominate women - Gary Brodsky

[deleted] · 4 March 2014 · Archived copy · Reddit

Amazon. Can also be found on piratebay.

What's it about?

How women want to be dominated, feminism is crap and the principles of domination.

Who's it for?

Beta males, or even natural alpha males or observants of such behavior will recognize patterns of behaviour that dominant males have and that women follow.

PROS

Short

Easy to read

CONS

A bit unsystematic

Some advice I cannot endorse (such as looks dont matter, only T-levels)

Not always well written

Some of the rules could have been given a better justification

Final thoughts

A good book for understanding how domination can work. I believe domination can be done in many ways, and as such there are no one way. But this book outlines some things that are very important and red pill. Really a good book for its time. Very unappreciated.

Thucydides, History of the Peloponnesian War

[deleted] · 14 January 2014 · Archived copy · Reddit

Thucydides (460-400 BCE) was an Athenian General and historian during the war between Athens and Sparta. He is considered as the father of realpolitik.

Link: http://en.wikisource.org/wiki/History_of_the_Peloponnesian_War

Quotes:

- The growth of the power of Athens, and the alarm which this inspired in Sparta, made war inevitable.
- Abstinence from all injustice to other first-rate powers is a greater tower of strength than anything that can be gained by the sacrifice of permanent tranquillity for an apparent temporary advantage.
- It is a common mistake in going to war to begin at the wrong end, to act first, and wait for disaster to discuss the matter.
- In practice we always base our preparations against an enemy on the assumption that his plans are good; indeed, it is right to rest our hopes not on a belief in his blunders, but on the soundness of our provisions. Nor ought we to believe that there is much difference between man and man, but to think that the superiority lies with him who is reared in the severest school.
- The bravest are surely those who have the clearest vision of what is before them, glory and danger alike, and yet notwithstanding, go out to meet it.
- He who voluntarily confronts tremendous odds must have very great internal resources to draw upon.
- The fate of those of their neighbours who had already rebelled and had been subdued was no lesson to them; their own prosperity could not dissuade them from affronting danger; but blindly confident in the future, and full of hopes beyond their power though not beyond their ambition, they declared war and made their decision to prefer might to right, their attack being determined not by provocation but by the moment which seemed propitious. The truth is that great good fortune coming suddenly and unexpectedly tends to make a people insolent; in most cases it is safer for mankind to have success in reason than out of reason; and it is easier for them, one may say, to stave off adversity than to preserve prosperity.
- Hope leads men to venture; and no one ever yet put himself in peril without the inward conviction that he would succeed in his design.
- The incalculable element in the future exercises the widest influence, and is the most treacherous, and yet in fact the most useful of all things, as it frightens us all equally, and thus makes us consider before attacking each other.
- Their judgment was based more upon blind wishing than upon any sound prediction; for it is a habit of mankind to entrust to careless hope what they long for, and to use sovereign reason to thrust aside what they do not desire.
- We hope that you, instead of thinking to influence us by saying that you did not join the Lacedaemonians, although their colonists, or that you have done us no wrong, will aim at what is feasible, holding in view the real sentiments of us both; since you know as well as we do that right, as the world goes, is only in question between equals in power, while the strong do what they can and the weak suffer what they must.

Greetings Gentlemen.

It is I. The most legit guy on here as some of you know.

I have good news for you gentlemen.

I have created a discord group where I will be sharing courses that I can't share on reddit

I am still uploading courses as we speak & I can't promote the link because copyright agents are after me.

I know that the discord will get banned, eventually.

So I created a private telegram channel which is \$5 a month.

The telegram channel will have more courses than the discord group & they will have access to request courses.

AND if a link gets taken down they'll be able to get a new one.

If you don't have \$5, that's fine, the discord is free. And i recommend all of you to join the discord first, to see how legitimate I am.

Whatever - Michel Houellebecq

Original title: Broadening of the battlefield

- **What is it about?**

The struggle of the original title is expressly associated with class struggle in a parody of slogans made popular by the Parisian student movement of 1968, which *Our Hero* extends to sexual, as well as economic antagonism. "The thesis is that the sexual revolution of the Sixties created not communism but capitalism in the sexual market, that the unattractive underclass is exiled while the privileged initiates are drained by corruption, sloth, and excess." - wikipedia

The novel tells the story of a depressed and isolated man stuck in a tedious but well-paying programming job. He is teamed up with a disturbing, desperate 28-year-old virgin, Raphael Tisserand, to deliver a series of seminars on the use of IT.

- **Pros** It is a very interesting book with RP truths all around.
- **Cons** Sometimes it gets very weird and it is too short.
- **Rating** 5, I think everyone should read it.

Film: Enough Said (2013)

LukeMooney · 17 May 2014 · Archived copy · Reddit

96% on Rotten Tomatoes and James Gandolfini in one of his last roles before death. I would like to recommend this film for two reasons.

1. It's a good film, and had restored a fraction of the enjoyment I used to get from Rom Coms before taking TRP.
2. The film captures Male-Female interaction in a (somewhat) realistic way that I think adheres to red pill thinking. There's also, only a few bluepill cringe moments, the rest was cool.

Enjoy

Burmese Days; a novel by George Orwell

heraleighhateme · 4 April 2014 · Archived copy · Reddit

Set toward the end of the British Empire's rule over India/Burma, the novel follows a British expat struggling with his identity and situation.

While I don't want to give away the punch line, the plot of this novel is driven by the varying Red Pill/Blue Pill actions of the protagonist. Very insightful depiction from the the author of *1984* and *Animal Farm*.

Thought I'd share for anyone looking for good fiction to read.

Travis McGee (series) - John D. McDonald

curiousthis · 12 January 2014 · Archived copy · Reddit

Travis McGee is a 'Salvage Consultant', kind of a detective vigilante of last resort and is as redpill as they come. I loved these books, and the cognitive dissonance as I read these in my bluepill days was incredible. Re-reading them now, I am amazed at how much I missed the first few times I read these (yes, these series of 21 books, I re-read frequently).

Travis is the ultimate redpill: he lives on a boat he won in a poker game. He makes money by making deals with people who were robbed and have no legal recourse to get their belongings back for 50% of what he can salvage. This enables him to live life as he sees fit between jobs.

He displays an incredible grasp of game, is relentless in his pursuit of self improvement, is smart, witty, a bit of a philosopher and so very human.

Here are some quotes to whet your appetite:

These are the playmate years, and they are demonstrably fraudulent. The scene is reputed to be acrawl with adorably amoral bunnies to whom sex is a pleasant social favor. The new culture. And they are indeed present and available, in exhausting quantity, but there is a curious tastelessness about them. A woman who does not guard and treasure herself cannot be of very much value to anyone else. They become a pretty little convenience, like a guest towel. And the cute little things they say, and their dainty little squeals of pleasure and release are as contrived as the embroidered initials on the guest towels. Only a woman of pride, complexity and emotional tension is genuinely worth the act of love, and there are only two ways to get yourself one of them. Either you lie, and stain the relationship with your own sense of guile, or you accept the involvement, the emotional responsibility, the permanence she must by nature crave. I love you can be said only two ways.

... a frightening number of people in the world are unaware of the actual living reality of the human beings around them. It is the complete absence of empathy in action. They believe themselves to be real, of course, yet they merely lack the imagination to see that other persons are also real in the same way and on the same terms. Thus, even though they go through the obligatory social forms and personal relationships, all other people are objects rather than people. If all other people are objects, then there can be no psychic trauma involved in treating them as objects.

Memory of a rumbling voice of the grandpa long ago: "Anything you can't take care of, kid, you don't deserve to own. A dog, a gun, a reel, a bike or a woman. You learn how to do it and you do it, because if you don't you hate yourself." An out-of-date morality. Anything you don't take care of, you replace.

We all think of the inconvenience of making an effort. We're all going to do the right things a little later on. Soon. But soon slides by so easily. Then we vow we'll try to do better. We all carry that little oppressive weight around in the back of our mind -- that we should be living better, trying harder, but we're not. We're all living just about as well as we can at any given moment. But that doesn't stop the wishing.

You can get them at your friendly neighborhood crack book dealer.

The Death of the West - Impetus of Feminism and other 'isms'

seekingyou12 · 15 October 2020 · Archived copy · Reddit

I've recently started to question the overall state of western culture as we see it today. With the current cultural climate and the unrest, I started researching how we arrived here. I came across a book called Death of the West, by Patrick Buchanan. In the book he basically outlines how the erosion of traditional western values has been sold to the American public. While this book was written almost 20years ago. Its fascinating to see direct correlation between current western culture and the facts outlined in this book, particularly chapter 4. This chapter outlines the impetus of feminism along with other moral eroding 'isms'. I've put the link below. If you find chapter 4 interesting, I'd urge you to go back and start from the beginning. All chapters are available on YouTube.

Are there any unofficial English translations of Vilar's "Das Ende der Dressur"?

pikadildo · 20 March 2017 · Archived copy · Reddit

I've been perusing Eric Crowley's writings about The Polygamous Sex and finding the ideas more interesting than I expected. To be fair I found most of Manipulated Man pretty obvious and not earth shaking. But the thesis in The Polygamous Sex as presented by Crowley is much more interesting. So I'm planning on reading that soon.

Anyway, The Manipulated Man, The Polygamous Sex and The End to Manipulation form a problem-analysis-prescription trilogy but the third part has not been translated to English. I found talk about crowd sourcing a translation a few years ago but I can't tell if that went anywhere. I can German but I'm much slower at it nowadays.

Sorry if I'm doing this wrong first time poster here. I've spent a lot of time on TRP and have used a couple posts on that sub to help pick out books. I'm currently finishing my senior year in high school and during second semester we take a senior seminar which is pretty much a semester course we choose rather than every other literature course we've had. But this is way besides the point. My point is the following. I'm only a few chapters in, but the entire series is all about male friendship and bonding. The Fellowship is just a handful of dudes banding together and getting shit done, something we all can agree is pretty fucking great. Now I realize LOTR is pretty fucking long, so if you don't have the time to read it, give the movies a watch. By no stretch of the imagination are they 100% faithful to the books, but they still get the general message of male friendship and bonding across.

Looking For Specific Book About Texting (or alternatives)

MunchingOnMaitotoxin · 11 January 2023 · Archived copy · Reddit

Hi All. Hope you are well.

A long time ago, I remember seeing a summary for a book aimed towards texting, which specifically mentioned how Dale Carnegie's *How To Win Friends And Influence People* was great, but not applicable to the modern age.

My memory tells me I saw the description either here or in the main RP sub, however I have not found any clues. If anyone can point me in a direction of that particular book, or other alternatives to up my text game (especially if it has an approach similar to *Models* by Mark Manson), that would be greatly appreciated.

Wish you all a great 2023 and a happy January 11th.

What does TRP think about the Ulysses ?

rajesh8162 · 23 April 2016 · Archived copy · Reddit

Hey guys, I've been reading about the artistic and scientific history of the 20th century. It mentions the book Ulysses and how it is one of the best books of the 20th century.

Most importantly, it is written to ultimately be a comedy and make people laugh.

From wikipedia, I found that it's ranked no.1 as the Editor's choice for the best book of the 20th century.

However its quite a heavy book in terms of work it takes to get cozy with it. Would love to know if anyone here has read it and how it relates to TRP.

Book About Using A Key Logger to See What Your Girl Is Really Saying to Other Men

20Nation · 27 December 2014 · Archived copy · Reddit

The Key Logger: A Forbidden Glimpse into the True Nature of Women is a book about myself using a key logger to see what really goes on behind the curtains of a woman's facebook, etc. I go through 12 relationships where I key logged the girls and go through patterns and advice for yourself on how to find the right girls that won't screw you over. I have written quite a few books, but this one is by far the most red pill and I think it's something all men need to read.

It has 34 reviews on amazon.com and many more on different red pill websites like rooshvforum, mattforney.com, and others.

Good for anyone considering getting in tangled with a dark triad girl. Writing shows some technical flaws, but it more than makes up for it in style and intensity, if you enjoy early Tom Waits songs, gritty art/literature it'll be right up your alley.

Two Excellent series on Two different Alpha Men

[deleted] · 10 February 2014 · Archived copy · Reddit

http://www.amazon.com/Emperor-Gates-Julius-Caesar-Series/dp/0385343019/ref=pd_sim_b_3

http://www.amazon.com/Genghis-Birth-Empire-A-Novel/dp/038534421X/ref=pd_sim_b_3

These two links are to the first books in two series by Conn Iggulden. One about Julius Caesar and one about Genghis Khan. These books are well written although they are not strictly historical fact. The style serves to bring life to the characters and is very engaging.

Many lessons about self improvement can be learnt from Genghis Khan - he starts as the weakest of his fathers sons and when their father is murdered they are banished from the clan. Genghis takes charge of his family and improves himself with incredible drive and will. He is possibly the best example of an Alpha warrior there is.

The books on Julius Caesar show many of the same aspects although Caesar is somewhat more civilised than Genghis he can be just as ruthless. Again, Caesar also starts as a weakling who is bullied by the older neighbouring children. He too pulls himself up from his bootstraps and unleashes his pure Alpha.

Both series are well worth the read and very inspirational. 5/5

Blood Meridian, or the Evening Redness in the West - Cormac McCarthy

[deleted] · 22 December 2013 · Archived copy · Reddit

McCarthy is, in my opinion, America's greatest living author of fiction. I am aware this accolade is at this point a cliché and that I am not the first to give it, but I stand by it. There are a few others I'd put in the same ballpark, such as Philip Roth or Gene Wolfe, but no author I have read matches McCarthy's mastery of language, illusion, dialogue, and moral examination through storytelling.

Blood Meridian is his best, and darkest work. It is also by far his most masculine.

The tale is of a gang of scalp hunters who terrorize the southwest border country during the Mexican-American war, led by the infamously cruel John Glanton and his pale right hand, the otherworldly, seven foot tall albino Judge Holden. The novel draws conscious parallels to *Paradise Lost* and *Moby Dick*, but in my opinion is a superior work both in language and in theme. The theme of the novel is war, and it spares no details, featuring some of the cruelest, and most complexly drawn villains in English literature.

But I'll let the text speak for itself.

Some quotes:

"The man who believes that the secrets of the world are forever hidden lives in mystery and fear. Superstition will drag him down. The rain will erode the deeds of his life. But that man who sets himself the task of singling out the thread of order from the tapestry will by the decision alone have taken charge of the world and it is only by such taking charge that he will effect a way to dictate the terms of his own fate."

"He poured the tumbler full. Drink up, he said. The world goes on. We have dancing nightly and this night is no exception. The straight and the winding way are one and now that you are here what do the years count since last we two met together? Men's memories are uncertain and the past that was differs little from the past that was not."

"Suppose two men at cards with nothing to wager save their lives. Who has not heard such a tale? A turn of the card. The whole universe for such a player has labored clanking to his moment which will tell if he is to die at that man's hand or that man at his. What more certain validation of a man's worth could there be? This enhancement of the game to its ultimate state admits no argument concerning the notion of fate. The selection of one man over another is a preference absolute and irrevocable and it is a dull man indeed who could reckon so profound a decision without agency or significance either one. In such games as have for their stake the annihilation of the defeated the decisions are quite clear. This man holding this particular arrangement of cards in his hand is thereby removed from existence. This is the nature of war, whose stake is at once the game and the authority and the justification. Seen so, war is the truest form of divination. It is the testing of one's will and the will of another within that larger will which because it binds them is therefore forced to select. War is the ultimate game because war is at last a forcing of the unity of existence. War is god."

Sociology of sexuality.

[deleted] · 6 January 2014 · Archived copy · Reddit

Hey - I'm looking for good books or peer reviewed articles on the sociology of sexuality. Goffman comes to mind, but specifically what books. What other books would be relevant?

Also, any other scientifically rigorous books would be useful. I recommend the *Moral Animal* by Robert Wright if anyone is interested.

Books on inner game?

chaoticgreat · 7 January 2014 · Archived copy · Reddit

Hey all. What titles would you recommend for improving one's inner game?

Thanks!

Link: http://www.lexido.com/EBOOK_TEXTS.aspx

- Become who you are.
- A weakened, thin, extinguished personality that denies itself is no longer fit for anything good—least of all for philosophy.
- What is the seal of liberation? To be no longer ashamed of oneself.
- Either we have no dreams or our dreams are interesting. One must learn to be awake in the same fashion: either not at all, or in an interesting manner.
- What is it that constitutes the history of each day for you? Look at your habits of which it consists: are they the product of numberless little acts of cowardice and laziness, or of your bravery and inventive reason?
- One thing is needful: to “give style” to one’s character that is a grand and a rare art! He who surveys all that his nature presents in its strength and in its weakness, and then fashions it into an ingenious plan, until everything appears artistic and rational, and even the weaknesses enchant the eye exercises that admirable art. Here, there has been a great amount of second nature added, there a portion of first nature has been taken away: in both cases with long exercise and daily labour at the task. Here, the ugly, which does not permit of being taken away, has been concealed, there it has been re-interpreted into the sublime. Much of the vague, which refuses to take form, has been reserved and utilised for the perspectives: it is meant to give a hint of the remote and immeasurable. In the end, when the work has been completed, it is revealed how it was the constraint of the same taste that organised and fashioned it in whole and in part: whether the taste was good or bad is of less importance than one thinks, it is sufficient that it was a taste! It will be the strong imperious natures which experience their most refined joy in such constraint, in such confinement and perfection under their own law; the passion of their violent volition lessens at the sight of all disciplined nature, all conquered and ministering nature: even when they have palaces to build and gardens to lay out, it is not to their taste to allow nature to be free. It is the reverse with weak characters who have not power over themselves, and hate the restriction of style: they feel that if this repugnant constraint were laid upon them, they would necessarily become vulgarised under it: they become slaves as soon as they serve, they hate service. Such intellects, they may be intellects of the first rank, are always concerned with fashioning and interpreting themselves and their surroundings as free nature, wild, arbitrary, fantastic, confused, and surprising: and it is well for them to do so, because only in this manner can they please themselves! For one thing is needful: namely, that man should attain to satisfaction with himself be it but through this or that fable and artifice: it is only then that man’s aspect is at all endurable!
- We are always in our own company.
- Such is man: a dogma might be refuted to him a thousand times, provided, however, that he had need of it, he would again and again accept it as ‘true’.
- What if a demon crept after you into your loneliest loneliness some day or night, and said to you: “This life, as you live it at present, and have lived it, you must live it once more, and also innumerable times; and there will be nothing new in it, but every pain and every joy and every thought and every sigh, and all the unspeakably small and great in your life must come to you again, and all in the same series and sequence — and similarly this spider and this moonlight among the trees, and similarly this moment, and I myself. The eternal sand-glass of existence will ever be turned once more, and you with it, you speck of dust!” — Would you not throw yourself down and gnash your teeth, and curse the demon that so spoke? Or have you once experienced a tremendous moment in which you would answer him: “You are a God, and never did I hear anything so divine!” If that

thought acquired power over you as you are, it would transform you, and perhaps crush you; the question with regard to all and everything: “Do you want this once more, and also for innumerable times?” would lie as the heaviest burden upon your activity! Or, how would you have to become favourably inclined to yourself and to life, so as to long for nothing more ardently than for this last eternal sanctioning and sealing?

- Ask yourselves whether a tree which is to grow proudly skywards can dispense with bad weather and storms.
- It is great pain only, the long slow pain which takes time, by which we are burned as it were with green wood, that compels us philosophers to descend into our ultimate depths, and divest ourselves of all trust, all good-nature, veiling, gentleness, and averageness, wherein we have perhaps formerly installed our humanity. I doubt whether such pain ‘improves’ us; but I know that it deepens us.
- One comes back out of such abysses, out of such severe sickness, and out of the sickness of strong suspicion: new-born, with the skin cast, more sensitive, more wicked, with a finer taste for joy, with a more delicate tongue for all good things, with a merrier disposition, with a second and more dangerous innocence in joy, more childish at the same time, and a hundred times more refined than ever before.

The Anti-Christ, by Friedrich Nietzsche

[deleted] · 14 January 2014 · Archived copy · Reddit

Link: <http://www.gutenberg.org/files/19322/19322-h/19322-h.htm>

Quotes:

- What is good? All that heightens the feeling of power, the will to power, power itself in men. What is bad? All that proceed from weakness. What is happiness? The feeling that power increases, that resistance is overcome. Not contentment, but more power; not peace at all, but war; not virtue, but proficiency. What is more harmful than any vice? Active sympathy for the ill-constituted and weak.
- Life itself appears to me as an instinct for growth, for survival, for the accumulation of forces, for power: whenever the will to power fails there is disaster.
- The formula of our happiness: a Yes, a No, a straight line, a goal.
- I call an individual depraved when he loses his instincts, when he chooses, when he prefers what is harmful to him.
- Every man must find his own virtue, his own categorical imperative.
- What destroys a man more quickly than to work, to think, and to feel without inner necessity, without any deep personal desire, without pleasure, as a mere automaton of duty? That is a recipe for decadence, and no less for idiocy.
- Love is the state in which man sees things most decidedly as they are not.
- We ourselves, we free spirits, are already a “transvaluation of all values,” a visualized declaration of war and victory against all the old concepts of “true” and “not true.”

Not Means Not Unless She Likes You.

satorivalencia · 25 September 2020 · Archived copy · Reddit

One of the main reasons why most men struggle understanding women is because females tend to communicate differently. Women use sub-communication while men often use over-communication.

When you approach a girl in the streets or in a bar she will rarely directly tell you that she is interested. You will have to read her body language, face expressions and voice tonality in order to know how she really feels about you.

When you express your interest on a girl and she declines your offers, makes an excuse or directly tell you the word 'Not' those negative responses often means that she is not really into you and you should probably move on but sometimes she will show IOIs (indicators of interest) during the interaction and still decline your advances.

If a girl rejects you while showing IOIs and sub-consciously displaying signs of attraction you should be more persistent in the interaction and try a bit harder to convince her. Sometimes women dismiss your advances not because they aren't attracted to you but because they don't feel qualified enough for them to feel safe expressing what they truly feel about you. And sometimes they want to let you know that they are not an easy catch in order to make you realize that they are not promiscuous and make you feel safe in pursuing a long term relationship with her.

I'm reading the red pill handbook and I'm on the part called how to know you're alpha by Illimitableman and I was looking down at the points but came to this one and can't understand what it means and need help to figure out what it means please help:

You see women as passive beings in the dating game to be acquired/seduced, not same-level equalists who are negotiated into contact. Attraction is not negotiable.

Anyway I have posted this elsewhere on reddit just for clarification in case anyone sees it posted it elsewhere.

Help me decide what books to read

POPPA_SMOKKA · 17 March 2021 · Archived copy · Reddit

I am new to the red pill philosophy. I have seen many books here about intersexual dynamics and relationships. but I am in my teens and have no interest in females so I don't want to read about seduction or relationship. But I am very intrigued by TRP's claim of knowing the truth, and I am not afraid of challenging ideas if it allows me to become the best version of myself. I want to read and understand blue pill lies in detail. So please suggest to me what books to read and in which order. Thank you.

Leaving my wonderfull GF without hurting her...

SufficientTrifle2252 · 30 April 2021 · Archived copy · Reddit

So the thing is this, I love my gf. The only thing is that I just like other women. Naturally, I love her but I also like other girls and I don't want to just be with one girl. But I find that even when I'm subtle and tell her that I may not be interested in just her, I feel like the truth just hurts so much for her. And I don't know what to do, because on one hand I can be single and do my thing, but on the other, I can just lie to her, and do my thing anyway.

Please note that I really love her and want to protect her, she is very happy with me and **I feel SUPER GUILTY if I broke up with her** because I know we both love each other and help us out a lot. I'm confused and sad because today we argue and I love her but I don't want to lie to her. The thing is that when I try to leave her, she cries out a lot and I feel horrible like I never did. And I don't want to hurt her...Help, please. Any suggestions are good at this moment.

Any advice, books on dealing with being cast out of a social circle, or being a social outcast.

lostnfoundm · 24 November 2021 · Archived copy · Reddit

Now, I am part of a social circle which has their uses.

But, I am low in access-level, and in the social hierarchy. There is an air of mild hostility with 1 or 2 of its prime members. A compound effect of my mental predispositions, a poor lifestyle, and efforts to move on over the last year or so led me here.

Now, the problem isn't the circle. The problem is quite possibly with me. My primary goal is to see if I can transform myself into a high social marketplace person, and someone I want to be. I would prefer to leave the group, but I am open to different strategies on dealing with this. I wouldn't mind evolving myself to fit in better, or cutting the circle out, or even moving on from it with a combination of the two.

Thank you for your time.

Agency Transmutation Beta Access [Week 1-3] – Montell Gordon

Link Download: <https://udcourse.com/product/montell-gordon-agency-transmutation/>

Agency Transmutation Beta Access Information

Agency Transmutation is an expertly crafted, 6-week long program that includes everything you could ever need in order to successfully scale your very own social media marketing agency from \$0 to \$10k/pm even if you are a complete beginner and have zero past experience or sales abilities.

The program comes with 35+ hours of expert training, an exclusive, members-only community full of winners, and all the scripts, templates, contracts, agreements, resources, and plug & play sheets you'll ever need.

The program also included a special bonus section of 10+ hours of live recorded coaching calls and access to Montell live through monthly Q&A calls hosted on Zoom.

This deadly combination of training, community and resources means you'll be on the fast track to successfully scaling your agency to \$10k per month using the 'Hybrid System'.

In simple terms... Agency Transmutation is Montell Gordon's brand-new, cutting-edge 6-week online program that teaches agency owners to scale to \$10k+ with a heavy emphasis on teaching lead sourcing and establishing consistent outreach systems.

Something that is notoriously skipped over by most teachers in the SMMA space!

"Innocent" yet provocative selfie vid/pic Social Media posts while in a serious monogamous relationship

Supersaiyanui1 · 4 December 2022 · Archived copy · Reddit

I've been dating my gf for over a year now and things have started getting serious (meeting the kids, saying "I love you, etc). As they have gotten serious, I've been bringing up some concerns I've only recently realized I've had. For instance, her social media activity/posting never bothered me before (throughout casual dating). I've noticed that now I am bothered by her SM usage. She is a beautiful girl and I consider some of her selfies (pics/vids) to be provocative in nature. Nothing too bad (a little cleavage and sexy body language). We almost broke up over it, but we talked it out. She claimed that she doesn't do it for external male attention and doesn't respond to any of the advances she receives. She says she does it for herself to kind of scrapbook herself when she likes how she looks... I heard her out and we moved on, but after a few days I noticed it still bothered me. I proceeded to explain to her that, "I trust you and am not saying that you are intentionally seeking this male attention. However, posting content like that invites that type of attention and it bothers me." She objected that she doesn't consider her posts to be provocative, and that's where we hit a wall. I contended that, I believe she knows the difference between posting a "cute" pic and posting something that promotes her being "sexy." She is hot and I know that she will always get male attention, but my quarrel is with posting content that encourages even more (thirsty) male attention. We parked the conversation there for the time being.

Things have been a bit awkward since (a few days ago). She is definitely not happy about it, but I explained to her that I'm not telling her what to do either. Just communicating that it bothers me.

I think the age gap might play a part (I'm 6yrs older). Not too big a difference number wise, but in terms of the generational difference it's substantial (I'm Gen X and she's a Millennial). I'm barely on social media and she is pretty active among several different apps (fb/instagram/snap chat/tiktok). Often I feel as though she cares more about her social media activity than our relationship. I'm afraid in the process of communicating all of this I might've come across as needy and might be ruining the relationship.

So, that's the sum of it. I just am not sure whether or not I'm:

A. Doing the right thing by communicating my concerns ^^I'm in the right and perhaps she isn't a good match

B. Being controlling/jealous and ruining my relationship ^^I need to work on my own insecurities and not ruin a potentially good thing.

Steven Kotler – Zero to Dangerous – Flow Research Collective

Are you struggling to balance your lofty professional goals with your family life, health and internal wellbeing?

What Results Should I Expect From Zero to Dangerous?

1. Laser-Like Clarity about where you're going in life and business, and exactly how to get there
2. Diamond-Like Adaptability so that pressure, adversity and uncertainty forge you into a stronger leader
3. Become Recession-Proof by spending your entire work day in flow (which we believe is the ultimate competitive edge)
4. 500% Increases In Productivity so you can get more done on Monday than you currently do in an entire week (no joke)
5. On-Demand Access To Flow States so you can stay in that hyper-focused zone and say goodbye to the distractions of technology and trivial nonsense
6. Remove Self-Sabotage, Urgency, And Overwhelm so that you can be fully present with your family and those who matter to you
7. Rockstar Resilience And Recovery to become that person who's always in a state of calm, unflinching, ruthless effectiveness
8. Free Up Your Time so you can have more space to think, develop skills, and pursue your passions

Zero to Dangerous is for you if...

You're a skilled professional with great ideas and bold goals. You're driven, disciplined, and creative. You are familiar with flow states and committed to performing at your absolute peak

- You're tired of the always-on, crazy busy, chaotic pace of the 21st century and you want to graduate to a new, smarter way of living and working
- You get paid well based on your ability to use your brain to solve problems (entrepreneurs, executives, knowledge workers)
- You identify as a high-performer... but you know the way you're working isn't optimal. Something is missing, and you don't want to leave results on the table

What you'll learn in Zero to Dangerous:

- **Week 1 — Cultivating Your Dangerous Mindset & Flow 101**

In this week you'll learn how the world's most successful people think and see reality. You'll also learn the neuroscience behind flow states so you can begin recreating them in your own life.

- **Week 2 — Becoming A Time Jedi & Battling Cognitive Load**

In this week we'll shatter any preexisting notions you have around the concept of time. Then we'll rebuild your perception of time from the bottom up so that you can unlock time abundance once and for all.

- **Week 3 — Reclaiming Sanity With Burnout Proofing, Recovery & Sleep**

This week you'll evolve into an executive athlete. That means learning how to sleep better than you ever have, dialling in your recovery practices and making yourself immune to burnout.

- **Week 4 — Optimizing Your Physiology With Positive Psychology**

In this week we'll teach you how to get your biology to work for you, not against you. You'll master the non-negotiable habits that science says every human being needs to be performing to max out performance.

- **Week 5 — Waging War On Distraction & Overwhelm**

This week is where you steal your sanity back from the technological overlords. We'll be helping you undo the brain melt and stimulation dependency. All so you can unlock a laser like focus so powerful you'll have to be careful where you look.

- **Week 6 — Limitless Motivation, Pristine Clarity & Flowy Execution**

This week will involve you finding that electricity running through your veins level motivation that fuels the world's top performers. You'll also learn the keys to 10xing what you currently get out of a workday.

- **Week 7 — Building A High Flow Lifestyle**

By now, you'll have a lot of the peak performance tools under wraps. Here we integrate it all so you can start to live at the upper edge of your potential. All the time. We'll make this a new normal for you.

- **Week 8 — Sustaining Peak-Performance Forever**

Most performance programs result in a short spike in performance for two to three months. Then behavior returns to baseline. Zero to Dangerous strives for the opposite. Your results should compound aggressively over the long term. This week shows you how.

[DOWNLOAD] Dawson Church – Mystic Brain

Bubbly997 · 5 January 2023 · Archived copy · Reddit

Dawson Church – Mystic Brain

Explore the Mystic Brain curriculum

Mystic Brain is a 22-day online journey towards mastery of your brain's neurochemicals: and in turn your ability to experience ecstatic bliss, peace, and flow in your daily moments.

On each day, you'll join Dawson Church for a 20-minute video lesson that takes you deep into the neurochemicals that shape your life: and the science-based transcendent practices and neurochemical meditations you can use to harness and regulate them to your benefit.

By the end of the program, you'll have all the tools and wisdom you need to naturally harness your neurochemistry – and transform how you think, feel, and perform in your everyday life.

The curriculum

PART 1: Dopamine, the motivational molecule (Day 1 – 3)

Dopamine is your “motivational molecule”: the chemical that lights up when you anticipate a reward, and that drives you to seek out more. And by harnessing dopamine in the correct way, you can leverage it to gain instant, lasting, and unconditional motivation to grow and achieve at your fullest potential. No more feeling demotivated or deflated when life throws you a curveball.

Highlights include:

- The dopamine neurochemical meditation: listen to this first thing in the morning to set yourself up for a whole day of motivation and forward momentum.
- Mastering your cravings: use this 3-minute journaling exercise to discover your unique dopamine triggers, and how to leverage them to feel and perform better in any moment.
- 5 instant dopamine-boosting rituals: from fun daily habits to listening to a very specific type of music – try these simple yet rewarding activities for a quick and lasting dopamine surge.
- And much more.

PART 2: Oxytocin, the hug drug (Day 4 – 6)

Love, bonding, and intimacy are spiritual experiences – and their gatekeeper is oxytocin, the chemical of profound human connection. When you learn how to regulate your oxytocin levels, you can consciously begin to deepen your bonds with others, and create an abundance of magic moments of closeness and unconditional love.

Highlights include:

- The oxytocin neurochemical meditation: use this meditation for an instant oxytocin glow up – perfect for just before moments of bonding, or social engagements with loved ones.
- Channeling unconditional, unshakable love: this exercise helps you embody pure love for another person, regardless of the blockers or conflict you might be experiencing with them.
- The daily habits of love: a hug, a phrase, or even just listening intently – discover the simple ways you can channel waves of ecstatic love into your daily life, in a matter of seconds.
- And much more.

PART 3: Norepinephrine, the attention focuser (Day 7 – 9)

If you've ever struggled to stay focused, alert, and productive for as long as need to: norepinephrine is the chemical you want. By learning how to naturally trigger this chemical, you'll have unlimited access to a source of natural _____

“inner caffeine” that helps you get more done in less time – without so much of the usual stress and frustrations.

Highlights include:

- The norepinephrine neurochemical meditation: sit back, relax, and set yourself up for a day of unbreakable focus and productivity.
- Freedom from your distractions: this journaling exercise helps you identify the biggest distractions in your daily life, and the best steps you can take to rise above them.
- Designing a life of deep focus: apply these easy lifestyle shifts to gain a remarkable immunity to the thoughts and habits that kill your focus and productivity.
- And much more.

PART 4: Serotonin, the satisfaction molecule (Day 10 – 12)

People who enjoy high levels of emotional wellbeing and fulfillment also have high levels of serotonin. That’s because this chemical – produced in the base of your brain – works with dopamine to make you feel good, while also protecting you from the ravages of angst, impulsive thoughts, and negative thought patterns.

Highlights include:

- The serotonin neurochemical meditation: some people use synthesized drugs for a serotonin boost – but you won’t have to with this meditation, which leaves you with a natural all-day glow.
- Your personal serotonin triggers: discover what really makes you feel like a million bucks, and how to leverage those triggers to feel even better.
- The 8 keys to happiness: experiment with these daily practices to keep your serotonin levels high, no matter what’s going on inside you or around you.
- And much more.

PART 5: Nitric oxide, the intensity powerhouse (Day 13 – 15)

Nitric oxide is the chemical of focused intensity: as in it helps you show up in your daily life fully and enthusiastically, ready to perform and create at your highest potential. This wonder chemical also has a host of other benefits, including improving your brain’s neuroplasticity (your ability to absorb new information and patterns), and even boosting your immunity.

Highlights include:

- The nitric oxide neurochemical meditation: awaken your fullest passion, energy, and focus – and prepare to embrace the day in a peak state of calm yet unstoppable intensity.
- The nitric oxide breathing technique: need a burst of intensity and vigor? Shift your breathing in this simple way, and watch it kick in instantly.
- The nitric oxide exercise routine: this simple set of four exercises isn’t too intense – but it’s a remarkably effective way for an instant boost to your intensity neurochemical.
- And much more.

PART 6: Beta endorphin for body ecstasy (Day 16 – 18)

Pain and physical discomfort can wreak havoc on your emotional states and your productivity: and beta endorphin is the chemical you need to eliminate it naturally, so you can return to a state of full-body bliss. Beta endorphin is three times stronger than synthetic morphine, yet countless times better for you.

Highlights include:

- The beta endorphin neurochemical meditation: use this soothing meditation to instantly vaporize pain, or to

guide your body into a state of wellness you can feel in every cell.

- Healing from within: if you're searching for freedom from painkillers or other pain-relieving medication, learning how to harness your beta endorphin could be your turning point.
- Crafting a pain-free life: try these easy daily practices to enter a lasting neurochemical state of high resilience to pain and physical discomfort.
- And much more.

PART 7: Anandamide, the bliss molecule (Day 19 – 21)

Marijuana is natural, but nothing's more natural than a bliss-inducing chemical produced by your own brain.

Anandamide is a gateway to the kind of joy that makes you smile for no reason, feel pleasure in its purest form, and express gratitude for yourself and your life. It's associated with high levels of the theta and gamma brainwaves, typically found in veteran meditators.

Highlights include:

- The anandamide neurochemical meditation: flood your body with unconditional joy and ecstasy, as you release all the negative thoughts and patterns that disrupt your bliss.
- The blissful symbolism exercise: create your very own symbol of ecstasy, and use it to drop into a state of pure bliss just by looking at it.
- The best exercises for bliss: all exercise is good for your emotions, but these ones are specially designed to ignite your bliss neurochemical in a flash, and leave you feeling ecstatic.
- And much more.

PART 8: Integration and continuing your journey (Day 22)

In the final step of your journey, you'll discover how to shift your ecstatic states into permanent traits that you can call on for life. By practicing your new skills, you'll be able to induce bliss, peace, and flow at the snap of a finger – and even without descending into deep meditation. In other words, a Mystic Brain is yours forever: and you've awakened to a whole new way of life.

Highlights include:

- An easy-to-follow post-program game plan: follow these steps to continue growing and glowing, long after the program is over.
- How to heal your traumas: unhealed trauma is one of the biggest blockers of spiritual and emotional growth – and by addressing yours in the right way, your path to ecstasy will be far clearer.
- Advanced practices for transcending to the next level: there are various levels to bliss and ecstasy – and if you'd like to go even deeper after completing the program, you'll have a variety of generous options ahead of you.
- And much more

Bubbly997 · 3 January 2023 · Archived copy · Reddit

LINK DOWNLOAD: The Bible of Pleasure: Become Her “Best Ever!”

70% of all women NEVER reach Orgasm during intercourse with their partner.

Look, brother.

Most women are used to AVERAGE sex and BELOW-AVERAGE foreplay (if at all)

They forget about a sexual experience soon after it happens.

Because it's very plain.

In fact, many of your girlfriends and wives might even be going through it.

Of course, you'll say-

“But I've never had any complaints.”

That's Because Women DON'T Want to Hurt YOUR Ego.

she's used to boring sex anyway- so she thinks that is the norm.

More importantly, it's always easier for her to just look for somebody who CAN give her good sex.

Do you consider yourself to be a Growth Minded, Action Taking Badass?

Because this is what happened with exactly that man who invested in this course

IF you Invest What you Spend on ONE date With an Average Chick (only to have boring sex later that night) &

- Give women multiple orgasms
- Never face performance anxiety again
- Last longer than anybody she's been with (or will be)
- Make her completely submit her body and her pleasure to YOU
- You Make her addicted to your D regardless of size
- She starts BEGGING you to see her every night
- You keep her on the edge with new techniques every night
- You Enjoy the best sex of her and your life.

Would you say it was a good return on your investment?

If you want your women to say

“Where did you learn that!?”

“Oh my god, I can't get enough of you!”

“When are we seeing each other again!?!?”

Only then can I allow you to get access to all the sexual hygiene, positions, techniques, bedroom and house etiquette, and proven methods to boost sexual performance and become her “best ever!”

Think of this as a LIFELONG TOOL that you can use to make EVERY WOMAN want you inside of her, ALL.THE.TIME.

Financial Slavery Masterclass by Jake Tran [Searching for 5 People!]

8inchjoystick · 19 January 2023 · Archived copy · Reddit

Who wants to team up to buy the "Financial Slavery Masterclass" course?

I'm really not trying to spend \$300 on videos, so if we can get like 5 other people together and we all put in \$50, I can download all the videos (Don't send money until we have confirmed 5 people). I'll likely record the videos using PowerPoint as a screen grabber (quality maintained with clean audio) and I can upload the .mp4 files to MEGA and send y'all the link to download.

DM me on here or leave a comment and I'll send you my discord. (Not putting it here, don't want to share my discord with the whole public)

TLDR; \$50 each person. Will send link ASAP and we all save \$250.

EDIT: Here's the link to the course: <https://www.evil.university/war>

He shows it off in this video: <https://www.youtube.com/watch?v=r0XChtIWsvY>

AI bot that swipes and chats for you on dating apps, is it ethical?

whoppinfeblood · 27 June 2023 · Archived copy · Reddit

I was stuck in a rut, tired of wasting my evenings endlessly swiping left or right on dating apps, trying to squeeze out a single, halfway decent date a month. It felt like I was constantly spinning my wheels and getting nowhere. Dating apps have always favored women, and I wanted to tip the scales. So, I did what any self-respecting programmer would do: I created a solution.

I built Cupidbot, which isn't just some generic swipe-right bot. This thing has been designed to learn from my personal preferences and past swiping behavior. It scans profiles, looking at pictures and bios to find my physical "type," and factors in other traits that I find appealing.

After swiping, it chats with the matches on my behalf. The responses it provides aren't just automated gibberish - they're optimized to secure a phone number or date. The language model was fine-tuned with Red Pill ideology at its core to project the image of a high-value man and appeal at women's subconscious value system. It chats like the kind of man who is too busy conquering the world to respond to messages within seconds. It can boast with just the right amount of arrogance and class, subtly hint at wealth, and always keep 'em guessing. This approach is irresistible because it taps into what many women are naturally drawn to: a man of status, a man of mystery.

I've also used it to filter out feminists and ultra woke women. I've already seen a dramatic uptick in the number and quality of dates I've secured since implementing Cupidbot. I can't tell you how much time it's saved me, not to mention the confidence it's given me, knowing that I have an efficient system in place that is getting me in front of the right people.

However, since releasing it the media has had quite a negative reaction:

<https://www.vice.com/en/article/m7bjqp/great-dating-apps-are-getting-more-hellish-thanks-to-ai-chatbots>

<https://futurism.com/the-byte/cupidbots-dating-app-ai-harassment>

<https://nypost.com/2023/03/20/i-was-wooded-by-chatgpt-cupidbot-ai-is-scary/>

<https://www.documentjournal.com/2023/03/cupidbot-ai-gpt4-chatbot-app-for-dating-on-tinder-bumble/>

This has tripped me up because I thought I was helping men. Do you think using AI to save time on dating apps is unethical?

Subtle touch is critical in establishing attraction - 5 ways to implement touch without being creepy

MO_drps_knwldg · 24 July 2023 · Archived copy · Reddit

1. Greet her with a LIGHT hug. Don't make it sexual or drawn out. Pretend it's the same way you'd greet your sister. This will establish comfort and demonstrate you are can trusted and mature with boundaries.
2. If walking across the street, or into a building, gently place your hand on her back and guide her. Do it in a protective manner, but don't make a big deal out of it
3. If sitting next to her, lightly touch her arm if making a point, or joking. Make it playful and non chalant, not blatantly sexual
4. If sitting across from her, incorporate light hand touching. Again, if the vibe is playful, brush or touch her hand as you joke. Or compliment her on her nails or jewelry, and lightly hold her hand under yours for a brief second. This can come off creepy if you do it too soon, or if she is blatantly uncomfortable during your interaction.
5. If you're going for a walk, GENTLY bump shoulders if you're teasing or laughing together. This can also give friend vibes if you do it too much, so use sparingly.

This topic is covered extensively in my book, *The Foundation: A Blueprint for Becoming an Authentically Attractive Man*

You have a stress reducing organ that can act as an antenna for manifestation, receive ecstasy from your Higher-self and many more incredible things.

Vib_ration · 4 September 2023 · Archived copy · Reddit

If you don't already know, you have in your own brain a laboratory that is also, on the metaphysical side, the place where the senses of your spiritual body are.

A special current of natural ecstasy, that you can activate to flow to that organ or that also activates directly from it, is the driving force for these senses and is known as your most powerful ability to create, defend and control your life.

It flows through the body via channels or meridians that connect all parts of the body and it can be easily activated and amplified through very specific breathing techniques.

You can most easily recognize this energy within you through self-induced goosebumps from positive events/stimuli.

Eventually, you can learn how to bring up this wave of euphoric energy without the physical reaction of goosebumps, feel it over your whole body and increase its duration, just like me and countless others have succeeded.

It has been researched and documented under many names like Euphoria, Tension, Ecstasy, Prana, Chi, Qi, Vayus, Aura, Tummo, Orgone, Kriyas, Mana, Od, Bio-electricity, Life force, Piti, Frisson, The Secret Fire, Vril, Odic force, on-demand quickening Voluntary Piloerection, Rapture, Ruah, Ether, Nephesch, Chills, ASMR, Nen, Spiritual Energy, The Force, Spiritual Chills and many more to be discovered with your help.

Here's a short [Youtube Video](#) talking about the pineal gland and how different cultures have been using this energy for it.

P.S. Everyone feels it at certain points in their life, some brush it off while others notice that there is something much deeper going on. Those are exactly the people you can find on [r/spiritualchills](#) where they share experiences, knowledge and tips on it.

MESSAGE/SUGGESTIONS TO R/REDPILLBOOKS mods or redpill in general. here has to be some sort of book discussion threads imo

[deleted] · 22 November 2014 · Archived copy · Reddit

i read some of the recomendations of this sub but i honstly think that theere should be a better discussion forums, aka, the post of a book only last so long before it gets archived and it no longer allows discussion. i persoanlly think there are better books to introduce and actually there we should in a way become a book club, like book of the week and then discuss the book in a megathread, aka sticky post for main book. I honestly hope that this happens since just recommneding books is just the top of the iceberg, because finding and while it may be red pill for some people there are others that think that that is not redpill at all. MAKE IT HAPPEN GUYS!!

My favorite excerpt:

A plant lives, although only in the restricted sense a living being. Actually there is life in it, or about it. "It" breathes, "it" feeds, "it" multiplies, we say, but in reality it is merely the theatre of processes that form one unity along with the processes of the natural environment, such as day and night, sunshine and soil-fermentation, so that the plant itself cannot will or choose. Everything takes place with it and in it. It selects neither its position, nor its nourishment, nor the other plants with which it produces its offspring. It does not move itself, but is moved by wind and warmth and light. Above this grade of life now rises the freely mobile life of the animals. But of this there are two stages. There is one kind, represented in every anatomical genus from unicellular animals to aquatic birds and ungulates, whose living depends for its maintenance upon the immobile plant-world, for plants cannot flee or defend themselves. But above this there is a second kind, which lives on other animals and whose living consists in killing. Here the prey is itself mobile, and highly so, and moreover it is combative and well equipped with dodges of all sorts. This second kind also is found in all the genera of the system. Every drop of water is a battlefield and we, who have the land-battle so constantly before our eyes that it is taken for granted or even forgotten, shudder to see how the fantastic forms of the deep sea carry on the life of killing and being killed.

The animal of prey is the highest form of mobile life. It implies a maximum of freedom for self against others, of responsibility to self, of singleness of self, an extreme of necessity where that self can hold its own only by fighting and winning and destroying. It imparts a high dignity to Man, as a type, that he is a beast of prey.

A herbivore is by its destiny a prey, and it seeks to escape this destiny by flight, but beasts of prey must get prey. The one type of life is of its innermost essence defensive, the other offensive, hard, cruel, destructive. The difference appears even in the tactics of movement—on the one hand the habit of flight, fleetness, cutting of corners, evasion, concealment, and on the other the straight-line motion of the attack, the lion's spring, the eagle's swoop. There are dodges and counter-dodges alike in the style of the strong and in that of the weak. Cleverness in the human sense, active cleverness, belongs only to beasts of prey. Herbivores are by comparison stupid, and not merely the "innocent" dove and the elephant, but even the noblest sorts like the bull, the horse, and the deer; only in blind rage or sexual excitement are these capable of fighting; otherwise they will allow themselves to be tamed, and a child can lead them.

Besides these differences in kind of motion, there are others, still more effective, in the organs of sense. For these are accompanied by differences in the mode of apprehending, of having, a "world." In itself every being lives in Nature, in an environment, irrespective of whether it notices this environment, or is noticeable in it, or neither. But it is the relation—mysterious, inexplicable by any human reasoning—that is established between animal and environment by touching, ordering, and understanding, which creates out of mere environment a world-around. The higher herbivores are ruled by the ear, but above all by scent; the higher carnivores on the other hand rule with the eye. Scent is the characteristically defensive sense. The nose catches the quarter and the distance of danger and so gives the flight-movement the appropriate direction, away from something.

But the eye of the preying animal gives a target. The very fact that, in the great carnivores as in man, the two eyes can be fixed on one point in the environment enables the animal to bind its prey. In that hostile glare there is already implicit for the victim the doom that it cannot escape, the spring that is instantly to follow. But this act of fixation by two eyes disposed forward and parallel is equivalent to the birth of the world, in the sense that Man possesses it—that is, as a picture, as a world before the eyes, as a world not merely of lights and colours, but of perspective distance, of space and motions in space, and of objects situated at definite points. This way of seeing which all the

higher carnivores possess—in herbivores, e.g. ungulates, the eyes are set sideways, each giving a different and non-perspective impression—implies in itself the notion of commanding. The world-picture is the environment as commanded by the eyes. The eye of the beast of prey determines things according to position and distance. It apprehends the horizon. It measures up in this battle field the objects and conditions of attack. Sniffing and spying, the way of the hind and the way of the falcon, are related as slavery and dominance. There is an infinite sense of power in this quiet wide-angle vision, a feeling of freedom that has its source in superiority, and its foundations in the knowledge of greater strength and consequent certainty of being no one's prey. The world is the prey, and in the last analysis it is owing to this fact that human culture has come into existence.

And, lastly, this fact of an innate superiority has become intensified, not only outwards, with respect to the light-world and its endless distances, but also inwards, as regards the sort of soul that the strong animals possess. The soul—this enigmatic something which we feel when we hear the word used, but of which the essence baffles all science, the divine spark in this living body which in this divinely cruel, divinely indifferent world has either to rule or to submit—is the counter-pole of the light-world about us, and hence man's thought and feeling are very ready to assume the existence of a world-soul in it. The more solitary the being and the more resolute it is in forming its own world against all other conjunctures of worlds in the environment, the more definite and strong the cast of its soul. What is the opposite of the soul of a lion? The soul of a cow. For strength of individual soul the herbivores substitute numbers, the herd, the common feeling and doing of masses. But the less one needs others, the more powerful one is. A beast of prey is everyone's foe. Never does he tolerate an equal in his den. Here we are at the root of the truly royal idea of property. Property is the domain in which one exercises unlimited power, the power that one has gained in battling, defended against one's peers, victoriously upheld. It is not a right to mere having, but the sovereign right to do as one will with one's own.

Once this is understood, we see that there are carnivore and there are herbivore ethics. It is beyond anyone's power to alter this. It pertains to the inward form, meaning, and tactics of all life. It is simply a fact. We can annihilate life, but we cannot alter it in kind. A beast of prey tamed and in captivity—every zoological garden can furnish examples—is mutilated, world-sick, inwardly dead. Some of them voluntarily hunger-strike when they are captured. Herbivores give up nothing in being domesticated.

Such is the difference between the destiny of herbivores and that of the beast of prey. The one destiny only menaces, the other enhances as well. The former depresses, makes mean and cowardly, while the latter elevates through power and victory, pride and hate. The former is a destiny that is imposed on one, the latter a destiny that is identical with oneself. And the fight of nature-within against nature-without is thus seen to be, not misery, as Schopenhauer and as Darwin's "struggle for existence" regard it, but a grand meaning that ennobles life, the *amor fati* of Nietzsche. And it is to this kind and not the other that Man belongs.

Quotes:

- Deed and thought, reality and ideal, success and redemption, strength and goodness—these are forces that will never come to terms with one another. Yet in historical reality it is not the ideal, goodness, or morality that prevails—their kingdom is not of this world—but rather decisiveness, energy, presence of mind, practical talent. This fact cannot be gotten rid of with laments and moral condemnations. Man is thus, life is thus, history is thus.
- The common man wants nothing of life but health, longevity, amusement, comfort—“happiness.” He who does not despise this should turn his eyes from world history, for it contains nothing of the sort. The best that history has created is great suffering.
- Today we live so cowed under the bombardment of this intellectual artillery, the media, that hardly anyone can attain to the inward detachment that is required for a clear view of the monstrous drama. The will-to-power operating under a pure democratic disguise has finished off its masterpiece so well that the object’s sense of freedom is actually flattered by the most thorough-going enslavement that has ever existed.
- Through money, democracy becomes its own destroyer, after money has destroyed intellect.
- Individualism is a reaction against the psychology of the mass. It is the last uprising of the carnivore soul against its captivity behind the bars of the Culture, the last attempt to shake off the spiritual and intellectual limitations that are produced by, and represented by, the fact of large numbers.
- Man lives constantly “in an image”; it governs his decisions, and shapes his mentality. He can never rid himself of an old image until he has acquired a new one and has made it completely his own.
- The first thing that confronts man in the form of Destiny is the time and place of his birth. This is an inescapable fact; no amount of thought can comprehend its origin, and no will can avert it. Moreover, it is the most decisive fact of all. Everyone is born into a people, a religion, a class, an age, a culture. It is Destiny that determines whether a man be born a slave in Periclean Athens, a knight at the time of the Crusades, or a laborer’s or rich man’s son in our own day. If anything can be called fate, fortune, or destiny, it is this. History means that life is constantly changing. For the individual, however, life is precisely thus and so, and not otherwise. With his birth, the individual receives his nature and a particular range of possible tasks, within which he has the privilege of free choice. Whatever his nature wills or is capable of, whatever his birth allows or prevents, for every individual there is prescribed a definite range of happiness or misery, greatness or cowardice, tragedy or absurdity, which will make up his life only. What is more, Destiny determines whether his life is to have significance for the lives of those around him, that is to say, whether it will be meaningful for history. In the light of this, the most fundamental of facts, all philosophizing about “the” task of “humanity” and “the” nature of “morality” is idle talk.

Gives an interesting breakdown of what really happens during no holds barred violence - exposing you to several very uncomfortable truths - which of course, you can use how you like.. What's most useful about it, is that you can translate it to getting shit done in your own life, and to subtle social violence that occurs in workplaces, clubs etc.

The Will to Power, by Friedrich Nietzsche

[deleted] · 26 December 2013 · Archived copy · Reddit

To the death of god is added the death of love. There are many parallels I think. And, Nietzsche surely has many things to say about becoming a self-actualized man. Those of you who enjoy philosophical works should enjoy this one. Here are some relevant quotes:

- The “great man” is great owing to the free play and scope of his desires and to yet greater power that knows how to express these magnificent monsters into service.
- The higher man is distinguished from the lower by his fearlessness and his readiness to challenge misfortune.
- Everything done in weakness fails.
- The “good man” is a symptom of exhaustion.
- The ideal slave: He who cannot posit himself a goal. He who does not posit any goals for himself whatever.
- The deeply wounded have Olympian laughter; one has only what one needs to have.
- Brave and creative men never consider pleasure and pain as ultimate values. One must desire both if one is to achieve anything.
- From the tension of forces that continually increase in us and do not yet know how to discharge themselves, there arises a condition like that preceding a storm: the nature we constitute becomes dark. A doctrine that puts an end to such a condition by commanding something or other (a revaluation of values by virtue of which the accumulated forces are shown a way, a whither, so they explode into lightning flashes and deeds) certainly does not need to be a doctrine of happiness: by releasing the force that had been compressed and dammed to the point of torment, it brings happiness.

I have Secution bible and more course. Looking for wifi money bible. (i dont mind sharing for free if u need anything just dm)

AllMyShqipz · 28 August 2022 · Archived copy · Reddit

Ive been getting good courses and books for some time and some have been really great. I dont know what this wifi money bible is about but currently there not many good guides on money out there so if anyone have it and want to trade dm.

I dont mind sharing the courses i already have, matter of fact back when seduction bible was very premium and not many people had it i shared that for free with alot of men.

Some courses i have are: Todd v verbal game academy (imo its the best so far) Charisma university Seduction bible freedom edition by masculinity rediscovered Andrew tate all his courses (except the hustler university 2.0 if anyone has that pls dm) RSD deleted the golden tapes 2011-2014 Biaheza full dropshipping course Iman gadzhi agency navigator Jimmy naraine Confident Body Language - ebooks (all the good redpill ones)

If u have wifi money bible dm ?
